As mentioned previously, the results of the study are not without limitations. The first limitation is the sample size, which was relatively small. This may have affected the generalizability of the findings. The second limitation is the self-reported nature of the data, which may be subject to bias. The third limitation is the cross-sectional design, which does not allow for the establishment of causality. Finally, the study did not control for other factors that may influence the relationship between the variables.
