making a single modifier and adding it to several objects you are sharing the modifier between the objects as you would by applying a modifier to a selection of objects in the 3ds Max user interface The constructors in the following classes can take any of the listed properties as optional keyword arguments with the defaults as shown Accessing Existing Modifiers Existing modifiers can be accessed in two ways Node Property Access Modifiers can be accessed as a property of a node Kelly L. Murdock's Autodesk 3ds Max 2016 Complete Reference Guide Kelly Murdock, 2015 Kelly L Murdock's Autodesk 3ds Max 2016 Complete Reference Guide is a popular book among users new to 3ds Max and is used extensively in schools around the globe The success of this book is found in its simple easy to understand explanations coupled with its even easier to follow tutorials The tutorials are laser focused on a specific topic without any extra material making it simple to grasp difficult concepts The book also covers all aspects of the software making it a valuable reference for users of all levels The Complete Reference Guide is the ultimate book on 3ds Max and like Autodesk's 3D animation software it just gets better and better with each release Whether you're new to 3ds Max or an experienced user you'll find everything you need in this complete resource The book kicks off with a getting started section so beginners can jump in and begin working with 3ds Max right away Experienced 3ds Max users will appreciate advanced coverage of features like crowd simulation particle systems radiosity MAXScript and more Over 150 tutorials complete with before and after files help users at all levels build real world skills *BUILDING A SPORTSCAR EXTERIOR TO CLASS-A SURFACING STANDARDS TUTORIAL* Serdar Hakan DÜZGÖREN, PREFACE INTRODUCTION TO CLASS A SURFACING Class A surfacing is to produce mathematical surfaces to the most exacting standard Once completed the A Class surface is the final output of styling design These surfaces are the Master for making the tools that produces the product itself Class A surfacing is one of the most complex and tedious 3D computer modeling tasks you can do Class A surface development occurs in the final phase of a project when constraints are much tighter to adhere to Modeling under these conditions is very hard without adoption of certain surface basics rules 3D computer modeling is still based on the knowledge and skill set of the individual user Therefore productivity and surface quality is user dependent The surfacing task can begin from the scan of a physical model as in this tutorial but it can also start from 2D sketch or verbal input In most cases it is the continuation of a concept 3D digital model Most of the time you will also need to be aware of and include flanges draft angles tool split lines and other engineering constraints In the tutorial these are not included To include them would put even more constraints on the modeling surfacing itself This tutorial demonstrates only one small part of class A surfacing but a very important element of creating good quality surfaces When you are starting a project or a part always take some time to think how you will build this before you start It is not a good idea to rush in the beginning of a project To be successful and to achieve that right quality in the time given you need a strategy Without this you can find yourself in a corner from which you can never escape a dead end These points below are in my opinion the most important basic rules to succeed It is very important to have a strategy on methodology surface layout

and surface construction Always try to build the surfaces to allow easy modification Keep the surfaces as simple as possible Always try to build to an intersection By following these basic rules you have come a long way to succeeding in your modeling Good luck
