If you're a musician or a hobbyist with experience in building electronic projects from kits or schematics, this do-it-yourself guide will walk you through the parts and schematics you need and how to tailor them for your needs. Author Ray Wilson shares his decades of experience in synth DIY, including the popular Music From Outer Space MFOS website and analog synth community. At the end of the book, you'll apply everything you've learned by building an analog synthesizer using the MFOS Noise Toaster kit. You'll also learn what it takes to create synth DIY electronic music studio. Get started in the fun and engaging hobby of synth DIY without delay. With this book, you'll learn: The differences between analog and digital synthesizers. Analog synthesizer building blocks including VCOs, VCFs, VCAs and LFOs. How to tool up for synth DIY, including electronic instruments and suggestions for home-made equipment. Foundational circuits for amplification, biasing and signal mixing. How to work with the MFOS Noise Toaster kit. Setting up a synth DIY electronic music studio on a budget. **Build AI-Enhanced Audio Plugins with C++** Matthew John Yee-King, 2024-06-21 **Build AI Enhanced Audio Plugins with C++** explains how to embed artificial intelligence technology inside tools that can be used by audio and music professionals through worked examples using Python, C and audio APIs which demonstrate how to combine technologies to produce professional AI-enhanced creative tools. Alongside a freely accessible source code repository created by the author that accompanies the book, for readers to reference, each chapter is supported by complete example applications and projects including an autonomous music improviser, a neural network-based synthesizer, meta-programmer and a neural audio effects processor. Detailed instructions on how to build each example are also provided, including source code extracts, diagrams and background theory. This is an essential guide for software developers and programmers of all levels looking to integrate AI into their systems, as well as educators and students of audio programming, machine learning and software development.

As composition flourishes in multiple media, digital, sonic, visual, etc., Byron Hawk seeks to connect new materialism with current composition scholarship and critical theory. Using sound and music as his examples, he demonstrates how a quasi-object can and does materialize for communicative and affective expression and becomes a useful mechanism for the study and execution of composition as a discipline. Through careful readings of Serres, Latour, Deleuze, Heidegger and others, Hawk reconstructs key concepts in the field, including composition, process, research, collaboration, publics and rhetoric. His work delivers a cutting-edge response to the state of the field where it is headed and the possibilities for postprocess and
