Engaging Curriculum Bill Green, 2017-09-18. Explicitly linking curriculum inquiry to English education via recurring themes of representation, democracy and knowledge, this book is a call for both researchers and practitioners to engage with curriculum explicitly and deliberately as both a concept and a question. The approach is broadly conceptual and constitutes an exercise in theoretical and philosophical inquiry. While deeply informed by North American debates and developments, this book offers a distinctive counterpoint and a strategically ex-centric perspective, being equally informed by the curriculum scene in Australia as well as the UK and elsewhere. Divided into two sections, this book first addresses matters of general curriculum inquiry while the second turns more specifically to English teaching and to associated questions of language literacy and literature in L1 education. Green brings the two together through a critical examination of the Australian national curriculum, especially in its implications and challenges for English teaching and with due regard for the project of transnational curriculum inquiry.
