Handbook on

Architectures of Information Systems Peter Bernus, Kai Mertins, Günter Schmidt, 2013-03-14 This book is the first volume of a running series under the title International Handbooks on Information Systems The series is edited by Peter Bemus Jacek Blazewicz Günter Schmidt and Mike Shaw One objective is to give state of the art surveys on selected topics of information systems theory and applications To this end a distinguished international group of academics and practitioners are invited to provide a reference source not only for problem solvers in business industry and government but also for professional researchers and graduate students It seemed appropriate to start the series with a volume covering some basic aspects about information systems The focus of the first volume is therefore architectures It was decided to have a balanced number of contributions from academia and practitioners The structure of the material follows a differentiation between modelling languages tools and methodologies These are collected into separate parts allowing the reader of the handbook a better comparison of the contributions Information systems are a major component of the entire enterprise and the reader will notice that many contributions could just as easily have been included in another volume of the series which is on enterprise integration Conversely some traditionally information systems topics as organisational analysis and strategic change management methods will be treated in more depth in the Handbook on Enterprise Integration The two volumes will complement each other

Weathering of Plastics George Wypych, 1999-12-31 In spite of extensive efforts material weathering testing still requires improvement This book presents findings and opinions of experts in material degradation testing The aim is to improve testing methods and procedures Materials are presented to show that photochemical degradation rate depends on a combination of environmental factors such as UV radiation temperature humidity rain stress and concentration of reactive pollutants The potential effect of each parameter of degradation on data gathered is discussed based on known results from a long experience in testing This book contains data obtained in laboratories of the largest manufacturers of UV stabilizers and chemical companies that manufacture durable materials The book gives details of testing procedures and choice of parameters of exposure which are crucial for obtaining laboratory results correlating with environmental performance of materials In addition to exposure conditions the book contains many suggestions on sample preparation and post exposure testing The effective use of these methods shortens testing time of materials and determines acceleration rate of testing The book also gives examples of complete well designed weathering experiments which may be used as patterns for selection of parameters and techniques for new studies The areas of research that still require more attention in future studies are clearly indicated
