improve and consolidate qualified governance arrangements in order to better address rapid economic and social changes. Such recommendations are applicable to cities and urban regions both within and outside of Europe. It identifies possible approaches, tools, and partnerships to tackle the effects of the crisis and to prepare European cities for future challenges.

**The Borders of "Europe"** Nicholas De Genova, 2017-08-26. In recent years, the borders of Europe have been perceived as being besieged by a staggering refugee and migration crisis. The contributors to *The Borders of Europe* see this crisis less as an incursion into Europe by external conflicts than as the result of migrants exercising their freedom of movement. Addressing the new technologies and technical forms European states use to curb control and constrain what contributors to the volume call the autonomy of migration, this book shows how the continent's amorphous borders present a premier site for the enactment and disputation of the very idea of Europe. They also outline how, from Istanbul to London, Sweden to Mali and Tunisia to Latvia, migrants are finding ways to subvert visa policies and asylum procedures while negotiating increasingly militarized and surveilled borders. Situating the migration crisis within a global frame and attending to migrant and refugee supporters as well as those who stoke nativist fears, this timely volume demonstrates how the enforcement of Europe's borders is an important element of the worldwide regulation of human mobility. Contributors: Ruben Andersson, Nicholas De Genova, Dace Dzenovska, Evelina Gambino, Glenda Garelli, Charles Heller, Clara Lecadet, Souad Osseiran, Lorenzo Pezzani, Fiorenza Picozza, Stephan Scheel, Maurice Stierl, Laia Soto, Bermant, Martina Tazzioli. [UV-Vis Luminescence Imaging Techniques / Técnicas de imagen de luminiscencia UV-Vis](#) Picollo, Marcello, Stols-Witlox, Maartje, Fuster López, Laura, 2020-03-04. Ever since its first introduction in the field of conservation, the role of UV-VIS luminescence fluorescence (UFL and UVf respectively) imaging has been expanding. The unique and significant contribution of this technique for investigation of cultural heritage has led to the development of new methodologies and applications. Each chapter in this volume can be read independently. While this means that some repetition may occur between the individual chapters, in particular regarding the explanation of terminology and methodology, such overlap provides interesting opportunities for cross-comparison of both terminology and methodology. In addition, it highlights similarities and differences between different situations in the practical application.
