Manuals Combined: DoD Security Engineering Facilities Planning; Design Guide For Physical Security Of Buildings; Antiterrorism Standards For Buildings And Specifications For Active Vehicle Barriers , Over 1 600 total pages Application and Use Commanders security and antiterrorism personnel planners and other members of project planning teams will use this to establish project specific design criteria for DoD facilities estimate the costs for implementing those criteria and evaluating both the design criteria and the options for implementing it The design criteria and costs will be incorporated into project programming documents *Metric Handbook* David Littlefield, 2012 For each building type the book gives basic design requirements principal dimensional data and details of relevant building regulations The book also contains information on broader aspects of design applicable to all building types such as materials acoustics and lighting and data on human dimensions and space requirements Significantly updated the new edition of this work focuses on sustainable design practice to make projects competitive within a green market [Risk Management Series: Risk Assessment - A How-To Guide to Mitigate Potential Terrorist Attacks Against Buildings](#) Federal Emergency Agency, U. S. Department Security, 2013-01-26 The Federal Emergency Management Agency FEMA developed this Risk Assessment A How To Guide to Mitigate Potential Terrorist Attacks Against Buildings to provide a clear flexible and comprehensive methodology to prepare a risk assessment The intended audience includes the building sciences community of architects and engineers working for private institutions building owners operators managers and State and local government officials working in the building sciences community The objective of this How To Guide is to outline methods for identifying the critical assets and functions within buildings determining the threats to those assets and assessing the vulnerabilities associated with those threats Based on those considerations the methods presented in this How To Guide provide a means to assess the risk to the assets and to make risk based decisions on how to mitigate those risks The scope of the methods includes reducing physical damage to structural and non structural components of buildings and related infrastructure and reducing resultant casualties during conventional bomb attacks as well as chemical biological and radiological CBR agents This document is written as a How To Guide It presents five steps and multiple tasks within each step that will lead you through a process for conducting a risk assessment and selecting mitigation options It discusses what information is required to conduct a risk assessment how and where to obtain it and how to use it to calculate a risk score against each selected threat This is one of a series of publications that address security issues in high population private sector buildings This document is a companion to the Reference Manual to Mitigate Potential Terrorist Attacks Against Buildings FEMA 426 and the Building Design for Homeland Security Training Course FEMA E155 This document also leverages information contained within the Primer for Design of

Commercial Buildings to Mitigate Terrorist Attacks FEMA 427 The primary use of this risk assessment methodology is for buildings although it could be adapted for other types of critical infrastructure The foundation of the risk assessment methodology presented in this document is based on the approach that was developed for the Department of Veterans Affairs VA through the National Institute for Building Sciences NIBS Over 150 buildings have been successfully assessed using this technique The risk assessment methodology presented in this publication has been refined by FEMA for this audience The purpose of this How To Guide is to provide a methodology for risk assessment to the building sciences community working for private institutions It is up to the decision makers to decide which types of threats they wish to protect against and which mitigation options are feasible and cost effective This How To Guide views as critical that a team created to assess a particular building will be composed of professionals capable of evaluating different parts of the building They should be senior individuals who have a breadth and depth of experience in the areas of civil electrical and mechanical engineering architecture site planning and security engineering and how security and antiterrorism considerations affect site and building design *Lloyd's Register OneOcean's Guide to Port Entry 1991-1992 Nations A-L* Lloyd's Register
