Rock Mechanics for Natural Resources and Infrastructure Development contains the proceedings of the 14th ISRM International Congress ISRM 2019 Foz do Iguaçu Brazil 13-19 September 2019. Starting in 1966 in Lisbon Portugal the International Society for Rock Mechanics and Rock Engineering ISRM holds its Congress every four years. At this 14th occasion the Congress brings together researchers, professors, engineers and students around contemporary themes relevant to rock mechanics and rock engineering. Rock Mechanics for Natural Resources and Infrastructure Development contains 7 Keynote Lectures and 449 papers in ten chapters covering topics ranging from fundamental research in rock mechanics laboratory and experimental field studies and petroleum mining and civil engineering applications. Also included are the prestigious ISRM Award Lectures: the Leopold Muller Award Lecture by professor Peter K. Kaiser and the Manuel Rocha Award Lecture by Dr. Quinghua Lei. Rock Mechanics for Natural Resources and Infrastructure Development is a must read for academics, engineers and students involved in rock mechanics and engineering. Proceedings in Earth and Geosciences Volume 6. The Proceedings in Earth and Geosciences series contains proceedings of peer-reviewed international conferences dealing in earth and geosciences. The main topics covered by the series include geotechnical engineering, underground construction, mining, rock mechanics, soil mechanics and hydrogeology.

Cruising World, 2001-01 *Cruising World*, 2001-01 Global Mobile Satellite Communications Stojce Dimov Ilcev, 2005-12-05

Global mobile satellite communications (GMSC) are specific satellite communication systems for maritime, land and aeronautical applications. It enables connections between moving objects such as ships, vehicles and aircrafts and telecommunications subscribers through the medium of communications satellites, ground earth stations, PTT or other landline telecommunications providers. Mobile satellite communications and technology have been in use for over two decades. Its initial application is aimed at the maritime market for commercial and distress applications. In recent years, new developments and initiatives have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits such as Little and Big LEO configurations and hybrid satellite constellations as Ellipso, Borealis and Concordia system. This book is important for modern shipping, truck, train and aeronautical societies because GMSC in the present millennium provides more effective business and trade with emphasis on safety and commercial communications. Global Mobile Satellite Communications is written to make bridges between potential readers and current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphics, illustrations and mathematics equations. Global Mobile Satellite Communications represents telecommunications technique and technology which can be useful for all technical staff.

Luisi,2012-12-06 The ever increasing public demand and the setting up of national and international legislation on safety assessment of potentially dangerous plants require that a correspondingly increased effort be devoted by regulatory bodies and industrial organisations to collect reliability data in order to produce safety analyses Reliability data are also needed to assess availability of plants and services and to improve quality of production processes in particular to meet the needs of plant operators and or designers regarding maintenance planning production availability etc The need for an educational effort in the field of data acquisition and processing has been stressed within the framework of EuReData an association of organisations operating reliability data banks This association aims to promote data exchange and pooling of data between organisations and to encourage the adoption of compatible standards and basic definitions for a consistent exchange of reliability data Such basic definitions are considered to be essential in order to improve data quality To cover issues directly linked to the above areas ample space is devoted to the definition of failure events common cause and human error data feedback of operational and disturbance data event data analysis lifetime distributions cumulative distribution functions density functions Bayesian inference methods multivariate analysis fuzzy sets and possibility theory etc **Soil**

Joining Efforts to Improve Data Quality and Harmonization Among European Population-Based Cancer Registries
