The report is a literature review and does not propose a new methodology. It is not an exhaustive list but summarises the main M E frameworks. This report represents the first step towards the development of operational guidelines for the design and implementation of national M E frameworks for CSA to be developed during the first quarter of 2019. The envisioned operational guidelines will address the core constraints and needs of Member States on both the design and implementation of an M E system that can simultaneously address CSA and sector reporting requirements for the 2030 Agenda climate instruments. These guidelines will address the principal need expressed by Member States that M E systems and indicators should be simple and not onerous. The intended users are practitioners designing CSA projects at country level and policy makers coordinating national sector monitoring and reporting efforts on climate change under the following three
