## A genre-based analysis of English research article abstracts and the linguistic feature of personal pronouns for financial economics

NING Zhen-jie

(English Department, College of Foreign Languages and Literature, North-West Normal University, Lanzhou 730078, China)

**Abstract:** This paper presents an empirical study of move structures and personal pronouns of fifty English RA (research article) abstracts based on the model of Bhatia (1990). It revealed that three other move patterns were ascertained besides ten out of the analyzed abstracts following his move order. The analysis of personal pronouns showed that first-person plural pronouns are used far more frequently than other types of personal pronouns and no presence of the second-person and the third-person pronouns were detected in the abstracts. A further analysis suggests that first-person plural pronouns can perform multiple functions in abstracts. ESP (English as Special Purpose) teachers may benefit from the study to guide students to explore the discourse conventions of the RA abstracts in their own texts.

**Key words:** RA abstract for financial economics; genre analysis; move; personal pronouns

### 1. Introduction

With the recognition of the role English plays in the world language, researchers need to read English research articles to keep abreast with the latest development of a relevant field and exchange academic information. "An abstract, as commonly understood, is a description or factual summary of the much longer report, and is meant to give the reader an exact and concise knowledge of the full article" (Bhatia, 1993, p. 78). It is, therefore, the urgent need that Chinese researchers and students obtain a comprehensive understanding of the genre knowledge about RA abstracts.

Over the last 20 years, a large number of studies on academic writing have focused on research articles, in particular, its structure, social construction and historical evolution (Samraj, 2002). Swales (1990, p. 132), in an overview of completed textual studies of the genre of the research article (RA), says that "it is easy to see that some fields are much less well represented than others; for example, there is very little on disciplines such as economics or sociology". Therefore, financial economics was chosen as the discipline of the present study to fill the gap. A further justification for the present study is that it will be a contribution to the comprehensive and global research in genre analysis of research articles.

### 2. Method

#### 2.1 General principles and procedures of data collection

In order to ensure reliability of the results as well as eliminate writer's biases, data collection should strictly follow the scientific method of sampling. Principles suggested by Nwogu (1997, p. 121) as to the selection of
