*The Tsunami Threat* Nils-Axel Morner, 2011-01-29 Submarine earthquakes submarine slides and impacts may set large water volumes in motion characterized by very long wavelengths and a very high speed of lateral displacement when reaching shallower water the wave breaks in over land often with disastrous effects This natural phenomenon is known as a tsunami event By December 26 2004 an event in the Indian Ocean this word suddenly became known to the public The effects were indeed disastrous and 227 898 people were killed Tsunami events are a natural part of the Earth's geophysical system There have been numerous events in the past and they will continue to be a threat to humanity even more so today when the coastal zone is occupied by so much more human activity and many more people Therefore tsunamis pose a very serious threat to humanity The only way for us to face this threat is by increased knowledge so that we can meet future events by efficient warning systems and aid organizations This book offers extensive and new information on tsunamis their origin history effects monitoring hazards assessment and proposed handling with respect to precaution Only through knowledge do we know how to behave in a wise manner This book should be a well of tsunami knowledge for a long time we hope

Heritage Building Information Modelling Yusuf Arayici, John Counsell, Lamine Mahdjoubi, Gehan Nagy, Soheir Hawas, Khaled Dweidar, 2017-02-10 Building Information Modelling BIM is being debated tested and implemented wherever you look across the built environment sector This book is about Heritage Building Information Modelling HBIM which necessarily differs from the commonplace applications of BIM to new construction Where BIM is being used the focus is still very much on design and construction However its use as an operational and management tool for existing buildings particularly heritage buildings is lagging behind The first of its kind this book aims to clearly define the scope for HBIM and present cutting edge research findings alongside international case studies before outlining challenges for the future of HBIM research and practice After an extensive introduction to HBIM the core themes of the book are arranged into four parts Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built environment practitioners researchers academics and students engaged in BIM HBIM building energy modelling building surveying facilities management and heritage conservation more widely

**Creating Standards and Specifications for the Use of Laser Scanning in Caltrans Projects** Jagannath Hiremagalur, Kin S. Yen, Kevin Akin, Triet Bui, Ty Aaron Lasky, Bahram Ravani, 2007

Advances on Mechanics, Design Engineering and Manufacturing V Cristina Machado del Val, Ramón Miralbes Buil, Guillermo Peris Fajarnés, María Moncho Santonja, Caterina Rizzi, Lionel Roucoules, 2025-05-03 This book contains the papers presented at the International Joint Conference on Mechanics Design Engineering innovative design and computer aided design Further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and nautical engineering and construction aeronautics and

aerospace design and modeling The book is divided into six main sections reflecting the focus and primary themes of the conference The contributions presented in this book will not only provide researchers engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work but also stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations
