Putting Social Media and Networking Data in Practice for Education, Planning, Prediction and Recommendation Mehmet Kaya,Şuayip Birinci,Jalal Kawash,Reda Alhajj,2019-12-27 This book focusses on recommendation behavior and anomaly among of social media analysis First recommendation is vital for a variety of applications to narrow down the search space and to better guide people towards educated and personalized alternatives In this context the book covers supporting students food venue friend and paper recommendation to demonstrate the power of social media data analysis Secondly this book treats behavior analysis and understanding as important for a variety of applications including inspiring behavior from discussion platforms determining user choices detecting following patterns crowd behavior modeling for emergency evacuation tracking community structure etc Third fraud and anomaly detection have been well tackled based on social media analysis This has is illustrated in this book by identifying anomalous nodes in a network chasing undetected fraud processes discovering hidden knowledge detecting clickbait etc With this wide coverage the book forms a good source for practitioners and researchers including instructors and students

Statistical Implicative Analysis Régis Gras,Einoshin Suzuki,Fabrice Guillet,Filippo Spagnolo,2008-07-06 Statistical implicative analysis is a data analysis method created by R gis Gras almost thirty years ago which has a significant impact on a variety of areas ranging from pedagogical and psychological research to data mining Statistical implicative analysis SIA provides a framework for evaluating the strength of implications such implications are formed through common knowledge acquisition techniques in any learning process human or artificial This new concept has developed into a unifying methodology and has generated a powerful convergence of thought between mathematicians statisticians psychologists specialists in pedagogy and last but not least computer scientists specialized in data mining This volume collects significant research contributions of

several rather distinct disciplines that benefit from SIA Contributions range from psychological and pedagogical research bioinformatics knowledge management and data mining

Measurement Analysis: An Introduction To The Statistical Analysis Of Laboratory Data In Physics, Chemistry And The Life Sciences Mario Caria, 2000-10-25 This book deals with the statistical treatment of experimental data It is also meant for those who are entirely new to the field of statistics and probability calculus and those who wish to obtain rigorous estimates of the uncertainties associated with the experimental results of any discipline such as meteorology engineering physics chemistry and the life sciences To understand the text only a basic understanding of differential calculus is required As an innovative teaching approach simple laboratory class experiments are used as the basis for developing a detailed statistical analysis This is done by directly using the students logbooks without re elaboration The approach is profitable and can be easily pursued by the layman People have in the past been confused by the many statistical definitions formulae and assumptions This book tries to avoid any arbitrary definition by using the recently introduced ISO directives All the concepts parameters and test variables for the modern treatment of experimental data are included Among them are the error uncertainty and its estimate the distribution functions and the associated parameters Every concept is associated with a simple experimental situation and the data analysis is performed in numerical detail For completeness the correlation of uncertainties with the error matrix is dealt with in greater detail All the tests of hypotheses are presented They are introduced from simple arguments and developed up to the analytical details The applications of the tests to the fitting of experimental curves of the t and F tests as well as the one most often used in the life sciences the ANOVA are shown a
