Ecomuseums and Climate Change Nunzia Borrelli,Raul Dal Santo,Peter Davis,2023-06-15 Climate change is a reality and communities around the world are now facing significant environmental problems rising global temperatures leading to increased risk of flooding fire and sea level rise resulting in the destruction of property and social infrastructure loss of biodiversity and tangible and intangible cultural heritage and damage to economies Little wonder then that the online conference held on 30 September 2021 with the title Ecomuseums and Climate Action attracted more than one hundred participants from countries whose communities are facing these problems This book presents the results of this conference where heritage experts community activists curators politicians and academics from several countries explored how ecomuseums and community museums are acting as catalysts for transition renewal and sustainable development and

how they might effectively contribute to the UN's Sustainable Development Goals and climate action. How can these organisations best contribute to the debate about the climate crisis and promote local action? Central to those actions are encouraging local people to recognise how important their cultural, natural and intangible cultural heritage is in making places special and giving a sense of belonging; why that heritage should be sustained and how heritage assets can be used to promote climate action. This book, with its remarkable collection of essays from around the world, demonstrates how small local actions considered together can have a dramatic and far-reaching impact. It will be warmly welcomed by anyone interested in climate action, heritage and museum studies and environmental issues.

Managing Archaeological Collections in Middle Eastern Countries Dianne Fitzpatrick, 2016-11-30. In this guide, archaeologist Dianne Fitzpatrick sees archaeological collections management as a means of integrating achievable good practice strategies into research designs and site management plans from the outset.

Strategic Management in the Arts Lidia Varbanova, 2013-01-03. Strategic Management in the Arts looks at the unique characteristics of organisations in the arts and culture sector and shows readers how to tailor a strategic plan to help these diverse organizations meet their objectives. Strategic management is an essential element that drives an organisation's success, yet many cultural organizations have yet to apply strategic thinking and entrepreneurial actions within the management function. Varbanova reviews the existing theories and models of strategic management and then relates these specifically to cultural organisations. Also included are sections on entrepreneurship and innovations in the arts, considering the concept of a learning organisation, an organisation able to adapt its strategy within a constantly changing complex environment. The book is structured to walk the reader through each element of the strategic plan systematically. With a fresh approach, key questions, examples, international cases to connect theory with practice and suggestions for further reading, this book is designed to accompany classes on strategic planning, cultural management or arts management.

New Approach to Cultural Heritage Le Cheng, Jianping Yang, Jianming Cai, 2021-10-26. This book addresses questions about theories of heritage, its methodologies of research and where its boundaries lie with tourism, urban development, post-disaster recovery, collective identities, memory or conflict. This book is a collection of heritage studies from a critical perspective, as a product of the 2018 ACHS Association of Critical Heritage Studies Conference in Hangzhou, the largest conference of its kind in Asia. The contributors cover a wide spectrum of issues in heritage studies, such as heritage management, accessibility to heritage, heritage conservation and heritage policy and heritage representation. It also examines the various contexts within which heritage emerges and how heritage is constructed within that context. Analyses are based on not only representations of heritage but also on the performativity. Explorations touch upon community involvement, landscape, history, children's literature, endangered food, architecture, advertisement, allotment garden and gender and visual art. As heritage has always been a locus of contested verities, the book offers a variegated approach to heritage studies. It provides students and scholars new perspectives on heritage study.

Managing Indoor Climate Risks in Museums Bart Ankersmit, Marc H.L. Stappers, 2016-09-28 This book elaborates on different aspects of the decision making process concerning the management of climate risk in museums and historic houses The goal of this publication is to assist collection managers and caretakers by providing information that will allow responsible decisions about the museum indoor climate to be made The focus is not only on the outcome but also on the equally important process that leads to that outcome The different steps contribute significantly to the understanding of the needs of movable and immovable heritage The decision making process to determine the requirements for the museum indoor climate includes nine steps Step 1 The process to make a balanced decision starts by clarifying the decision context and evaluating what is important to the decision maker by developing clear objectives In Step 2 the value of all heritage assets that are affected by the decision are evaluated and the significance of the building and the movable collection is made explicit Step 3 The climate risks to the moveable collection are assessed Step 4 Those parts of the

building that are considered valuable and susceptible to certain climate conditions are identified Step 5 The human comfort needs for visitors and staff are expressed Step 6 To understand the indoor climate the building physics are explored Step 7 The climate specifications derived from step 3 to 5 are weighed and for each climate zone the optimal climate conditions are specified Step 8 Within the value framework established in Step 1 the options to optimize the indoor climate are considered and selected Step 9 All options to reduce the climate collection risks are evaluated by the objectives established in Step 1
