Ifap 2013 14 Student Handbook:

Handbook of Research on Competency-Based Education in University Settings Rasmussen, Karen, Northrup, Pamela, Colson, Robin, 2016-10-04 The majority of adult learners are looking to attain their desired academic credentials within the shortest amount of time possible. By implementing competency-based programs, learners are accelerated through their designed program or course. The Handbook of Research on Competency-Based Education in University Settings is a pivotal reference source for the latest academic research on the use of competency-based testing in higher education institutions. Focusing on innovative practices, strategies, and real-world scenarios, this book is ideally designed for educators, students, administrators, professionals, and academics interested in emerging developments for competency-based education initiatives.

The First Year of College Robert S. Feldman, 2018 An examination of the first year of college and the intersecting challenges facing today's students, written by top educational researchers.

The Sage Handbook of Sociology of Education Mark Berends, Barbara Schneider, Stephen Lamb, 2023-12-06 The Sage Handbook of Sociology of Education is an international and comprehensive groundbreaking text that serves as a touchstone for researchers and scholars interested in exploring the intricate relationships between education and society. Leading sociologists from five different continents examine major topics in sociology from a global perspective. This timely, thought-provoking Handbook features contributions from leading and emerging sociology scholars who provide their own cultural and historical perspectives on diverse yet universal topics. These include educational policy, social stratification, and cross-national research. 39 Chapters delve into the pressing issues faced by our global society, such as the effects of residential mobility on educational outcomes, gender and ethnic inequalities, and the impact of COVID-19 on early childhood education. Readers will gain a multifaceted view of the contours of educational inequality from various international perspectives and, focusing on country differences, as well as recommendations for expanding the practices, programs, and policies that could reduce the rising tide of inequities, especially for populations most at risk. This Handbook offers rich, diverse perspectives on the interplay between education, social inequality, and human rights around the world, making it an invaluable resource for students, researchers, and practitioners across a range of fields, including sociology, education, and social policy.

Technology Ulrich Hilpert, 2015-10-05 This handbook provides a comprehensive global survey of the politics of technology. Written by an outstanding line up of distinguished scholars in the field, the handbook covers all aspects of the relationship between politics and technology, including demand and support for new technologies and innovation by the state, the effects of technology policies, technology development and innovation, differences between various countries and regions, policy instruments and techno-industrial innovation, dynamism and change as outcomes of government policies, driving forces for science and innovative development. Forming the basis of this handbook are examples of regional development, country studies, and a rich variety of technologies, as well as topical issues such as divergent political interests in relation to technology and the economic exploitation of technologies. Employing a comparative and interdisciplinary approach in order to analyse the interplay between government activities and the development of new technologies, this handbook will be an invaluable resource for all students, scholars, and practitioners working in the politics of technology, public policy, and policy analysis.

Handbook of Research on Technology Tools for Real-World Skill Development Rosen, Yigal, Ferrara, Steve, Mosharraf, Maryam, 2015-10-19 Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem-solving skills for the digital age. The Handbook of Research on Technology Tools for Real-World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem-solving skills necessary in everyday life. Featuring timely research-based chapters exploring the broad scope of digital and computer-based learning strategies, including but not limited to enhanced classroom experiences, assessment programs, and problem-solving training, this publication is an essential reference source for academicians, researchers, professionals, and policymakers interested in the practical application of technology-based learning for next-generation education.

A Leader's Guide to Competency-Based Education Laurie Dodge, Deborah J. Bushway, Charla S. Long, 2023-07-03 As interest in competency-based education (CBE) continues to grow by leaps and bounds, the need for a practical resource to guide development of high-quality CBE programs led the authors to write this book. Until now, there has been no how-to manual that captures in one place a big picture view of CBE along with the down-to-earth means for building a CBE program. A variety of pressures are driving the growth in CBE, including the need for alternatives to the current model of higher education with its dismal completion rates, the potential to better manage the iron triangle of costs, access, and quality, the need for graduates to be better prepared for the workforce, and the demands of adult learners for programs with the flexible time and personalized learning that CBE offers. Designed to help institutional leaders become more competent in designing, building, and scaling high-quality competency-based education (CBE) programs, this book provides context, guidelines, and process. The process is based on ten design elements that emerged from research funded by the Gates Foundation and sponsored by AAC. Providing models, checklists, and considerations to determine the what

Real-Time Student Assessment Peggy L. Maki, 2023-07-03 This book challenges institutions and their programs to prioritize the use of chronological assessment results to benefit enrolled students in comparison with the more common practice of prolonged assessment cycles that generally benefit future students. Peggy Maki advocates for real time assessment processes to identify patterns of underperformance and obstacles that require timely interventions for enrolled students to succeed. In tandem with the sets of educational practices and policies that many institutions have now undertaken to close achievement and graduation rates across our diverse student demographics such as developing clear degree pathways, she calls on all higher education providers if they are to remain relevant and meet their social purpose in our complex world to urgently recalibrate their assessment processes to focus on currently enrolled students' progress towards achieving a high quality degree regardless of when they matriculate or re-enter higher education. She demonstrates that we already have sufficient examples and evidence to implement real time assessment of students as they progress through their studies. She draws on the practices of specialized accredited programs such as those in the professions that assess in real time on the experiences of institutions that have adopted competency based education and on the affordances of technologies that now provide faculty and students with up to the minute diagnostics. She identifies the six principles necessary to implement a real time assessment process illustrated by case studies of how campuses have operationalized them to advance students' equitable progress towards achieving a high quality degree and demonstrates the benefits of real time assessment compared to more future oriented processes among which is engaging students in reflecting on their own progress along their degree pathways. She advocates for the use of well documented national outcomes based frameworks such as Liberal Education and America's Promise LEAP, its aligned Valid Assessment of Learning in Undergraduate Education scoring rubrics, VALUE, the Degree Qualifications Profile and discipline based outcomes assessments to ensure high quality degrees that meet well defined standards and criteria. She also identifies how data systems and technological developments help to monitor closely and respond in time to students' patterns of underperformance. The book is an urgent call for higher education to achieve the values of equity, transparency and quality it espouses and ensure that all students graduate in a timely fashion with the competencies they need to be active and productive citizens.
