Modernizing Academic Teaching and Research in Business and Economics Jorge Marx Gómez, Marie K. Aboujaoude, Khalil Feghali, Tariq Mahmoud, 2017-04-25. This proceedings volume brings together the results of a corporate discussion on research academic teaching and education in the field of business and economics in the context of globalization. The contributions examine leadership and sustainability, quality and governance, and the internationalization of higher education. With a particular focus on business education and business schools, the book discusses the labor market and modernization as well as contemporary trends and challenges. By including both academic papers and contributions from industry, it forges research links between academia, business, and industry.

Introduction To Geographical Information Systems Prithvish Nag And Smita Sengupta, Prithvish Nag, 2008. In Indian context.

GIS K. Elangovan, 2006. Geographic Information Systems, or popularly known as GIS, has been developing its roots since the role of remote sensing has increased. It spreads its branches to civil engineering, geosciences, forestry, disaster mitigation, ecology, and environment, and various other fields. The book explains the concepts of GIS in a simple language. Topics like development of GIS data structures, database concepts, map projections, requirement of hardware and software for implementing GIS, errors and removing errors, advanced analysis, are a few chapters to be named which find place in this book.

Principles of Map Design Judith A. Tyner, 2017-09-12. This authoritative reader-friendly text presents core principles of good map design that apply regardless of production methods or technical approach. The book addresses the crucial questions that arise at each step of making a map: Who is the audience? What is the purpose of the map? Where and how will it be used? Students get the knowledge needed to make sound decisions about data, typography, color, projections, scale, symbols, and nontraditional mapping and advanced visualization techniques. Pedagogical Features: Over 200 illustrations also available at the companion website as PowerPoint slides, including 23 color plates. Suggested readings at the end of each chapter. Recommended Web resources. Instructive glossary.

Spatiality Vít Pászto, Carsten Jürgens, Polona Tominc, Jaroslav Burian, 2019-11-06. This open access book is based on Spatiality: Spatial Exploration of Economic Data, an interdisciplinary and international project in the frame of ERASMUS funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics. For the newly introduced courses, interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed consisting of one student from each

university participating in the project The achieved results were presented in a summer school a few months later At this event more methodological knowledge was imparted to prepare students for a final simulation game about spatial and economic decision making In a broader sense the chapters will present the methodological background of the project give case studies and show how visualisation and the simulation game works
