Intelligent Systems in Production Engineering and Maintenance IV Anna Burduk, Pichai Janmanee, Andre D. L. Batako, Justyna Patalas-Maliszewska, Ewa Dostatni, Joanna Kochańska, Ryszard Wyczółkowski, 2025-09-20 This book reports on intelligent systems and methods applied to engineering production and maintenance Being the second of two volumes it specifically focuses on advanced tools for optimizing manufacturing processes increasing their automation safety and sustainability It covers cutting edge topics in quality control predictive maintenance green supply chain and circular economy and their significance for different industries Based the 5th International Conference on Intelligent Systems in Production Engineering and Maintenance ISPEM 2025 held on June 25 27 2025 in Wroclaw Poland this book offers a timely snapshot of intelligent systems applications and advances in industry 4.0 in engineering design and manufacturing

Human-Robot Interaction Paolo Barattini, Federico Vicentini, Gurvinder Singh Virk, Tamas Haidegger, 2019-04-12 Human Robot Interaction Safety Standardization and Benchmarking provides a comprehensive introduction to the new scenarios emerging where humans and robots interact in various environments and applications on a daily basis The focus is on the current status and foreseeable implications of robot safety approaching these issues from the standardization and benchmarking perspectives Featuring contributions from leading experts the book presents state of the art research and includes real world applications and use cases It explores the key leading sectors robotics service robotics and medical robotics and elaborates on the safety approaches that are being developed for effective human robot interaction including physical robot human contacts collaboration in task execution workspace sharing human aware motion planning and exploring the landscape of relevant standards and guidelines Features Presenting a comprehensive introduction to human robot interaction in a number of domains including industrial robotics medical robotics and service robotics Focusing on robot safety standards and benchmarking Providing insight into current developments in international standards Featuring contributions from leading experts actively pursuing new robot development

Industrial Robot Applications E. Appleton, D.J. Williams, 2012-12-06 The hardest data for managers and engineers in charge of the design and implementation of robot systems to acquire is also the most valuable case studies detailing best current practice and the return on investment actually achieved It has been a major goal of the British Robot Association among other professional groups to organise meetings where such case studies are presented and discussed between members but the obvious restrictions of commercial confidentiality lead to considerable difficulty especially in relation to the best recent installations The authors of this book have been in the uniquely privileged position of lecturing in the Cambridge University Production Engineering Tripos a course specially organised in conjunction with a number of leading companies applying robots and automation Actual case studies from these companies form an important part of the course making this book that has emerged from it a uniquely important addition to our Open University Press series
