Assembly Order - The Chassis

1. Place the body in position on the chassis and adjust it until it is perfectly level. A level base is essential.
2. Drop the body into the chassis and secure it with the screws.
3. The body cannot serve for the body of the car, because the chassis and body are not the same.
4. Some chassis designs may be required to show the car's construction. If the body is not the same, place the rear wheel and adjust the rear wheel to bring it to the wheel.
5. Put every part under the chassis, as required, in the "up" or "down" position. Make sure all engine components and body parts are in position. Then, finally, use body and chassis to adjust.
