Millennium Development Goals Sakiko Fukuda-Parr, 2017-07-14 Heralded as a success that mobilized support for development the Millennium Development Goals MDGs ushered in an era of setting development agendas by setting global goals This book critically evaluates the MDG experience from the capabilities and human rights perspectives and questions the use of quantitative targets as an instrument of global governance It provides an account of their origins trajectory and influence in shaping the policy agenda and ideas about international development during the first 15 years of the 21st century The chapters explore whether the goals are adequate as benchmarks for the transformative vision of the Millennium Declaration how the goals came to be formulated the way they were drawing on interviews with key actors who were involved in the process how the goals exercised influence through framing to shape policy agendas on the part of both developing countries and the international community the political economy that drove the formulation of the goals and their consequences on the agendas of the South and the North the effects of quantification and indicators on ideas and action and the lessons to be drawn for using numeric goals to promote global priorities Representing a significant body of work on the MDGs in its multiple dimensions compiled here for the first time as a single collection that tells the whole definitive story this book provides a comprehensive resource It will be of great interest to students researchers and policymakers in the fields of development human rights international political economy and governance by numeric indicators Global Monitoring Report 2010 World Bank, International Monetary Fund, 2010-05-04 Global Monitoring Report 2010 The MDGs after the Crisis examines the impact of the worst recession since the Great Depression on poverty and human development outcomes in developing countries Although the recovery is under way the impact of the crisis will be lasting and immeasurable

Global Monitoring Report, 2010 International Monetary Fund, 2010-04-22 What is the human cost of the global economic crisis This year's Global Monitoring Report The MDGs after the Crisis examines the impact of the worst recession since the Great Depression on poverty and human development outcomes in developing countries Although the recovery is under way the impact of the crisis will be lasting and immeasurable The impressive precrisis progress in poverty reduction will slow particularly in low income countries in Africa No household in developing countries is immune Gaps will persist to 2020 In 2015 20 million more people in Sub Saharan Africa will be in extreme poverty and 53 million more people globally Even households above the 1.25 a day poverty line in higher income developing countries are coping by buying cheaper food delaying other purchases reducing visits to doctors working longer hours or taking multiple jobs The crisis will also have serious costs on human development indicators 1.2 million more children under age five and 265 000 more infants will die between 2009 and 2015 350 000 more students will not complete primary education in 2015 100 million fewer people will have access to safe drinking water in 2015 because of the crisis History tells us that if we let the recovery slide and allow the

crisis to lead to widespread domestic policy failures and institutional breakdowns in poor countries the negative impact on human development outcomes especially on children and women will be disastrous The international financial institutions and international community responded strongly and quickly to the crisis but more is needed to sustain the recovery and regain the momentum in achieving the Millennium Development Goals MDGs Developing countries will also need to implement significant policy reforms and strengthen institutions to improve the efficiency of service delivery in the face of fiscal constraints Unlike previous crises however this one was not caused by domestic policy failure in developing countries So better development outcomes will also hinge on a rapid global economic recovery that improves export conditions terms of trade and affordable capital flows as well as meeting aid commitments to low income countries Global Monitoring Report 2010 seventh in this annual series is prepared jointly by the World Bank and the International Monetary Fund It provides a development perspective on the global economic crisis and assesses the impact on developing countries their growth poverty reduction and other MDGs Finally it sets out priorities for policy responses both by developing countries and by the international community

Millennium Development Goals Progress Report, Lao PDR Laos, United Nations, 2004

Select Proceedings of the European Society of International Law, Volume 2, 2008 Hélène Ruiz Fabri, Ruediger Wolfrum, Jana Gogolin, 2010-06-30 This book continues the series Select Proceedings of the European Society of International Law containing the proceedings of the Third Biennial Conference organised by ESIL and the Max Planck Institute for Comparative Public Law and International Law in 2008 The conference was entitled International Law in a Heterogeneous World reflecting an idea which is central to the ESIL philosophy Heterogeneity is considered one of the pillars upon which Europe's contribution to international law is built and the subject was considered in a number of panels including such diverse topics as migration the history of international law the rules on warfare and international environmental law

State of the World's Cities 2010/11 UN-Habitat, 2010-08-12 The world's urban population now exceeds the world's rural population What does this mean for the state of our cities given the strain this global demographic shift is placing upon current urban infrastructures Following on from previous State of the World's Cities reports this edition uses the framework of The Urban Divide to analyse the complex social political economic and cultural dynamics of urban environments In particular the book focuses on the concept of the right to the city and ways in which many urban dwellers are excluded from the advantages of city life using the framework to explore links among poverty inequality slum formation and economic growth The volume will be essential reading for all professionals and policymakers in the field as well as a valuable resource for researchers and students in all aspects of urban development Published with UN Habitat

Global Monitoring Report 2009 World Bank, 2009-04-27 A Development Emergency the title of this year's Global Monitoring Report the sixth in an annual series could not be more apt The global economic crisis the most severe since the Great Depression is rapidly turning into a human and development crisis No region is immune The poor countries are especially vulnerable as they have the least cushion to

withstand events The crisis coming on the heels of the food and fuel crises poses serious threats to their hard won gains in boosting economic growth and reducing poverty It is pushing millions back into poverty and putting at risk the very survival of many The prospect of reaching the Millennium Development Goals MDGs by 2015 already a cause for serious concern now looks even more distant A global crisis requires a global response The crisis began in the financial markets of developed countries so the first order of business must be to stabilize these markets and counter the recession that the financial turmoil has triggered At the same time strong and urgent actions are needed to counter the impact of the crisis on developing countries and help them restore strong growth while protecting the poor Global Monitoring Report 2009 prepared jointly by the staff of the World Bank and the International Monetary Fund provides a development perspective on the global economic crisis It assesses the impact on developing countries their growth poverty reduction and other MDGs And it sets out priorities for policy response both by developing countries themselves and by the international community The report also focuses on the ways in which the private sector can be better mobilized in support of development goals especially in the aftermath of the crisis

The United Nations World Water Development Report 3 World Water Assessment Programme,2012-05-23 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world s freshwater resources It offers best practices as well as in depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies commissions program funds secretariats and conventions that have a significant role in addressing global water concerns The news media are full of talk of crises in climate change energy and food and troubled financial markets These crises are linked to each other and to water resources management Unresolved they may lead to increasing political insecurity and conflict Water is required to meet our fundamental needs and rising living standards and to sustain our planet s fragile ecosystems Pressures on the resource come from a growing and mobile population social and cultural change economic development and technological change Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water The challenges though substantial are not insurmountable The Report shows how some countries have responded Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions But other areas remain unaddressed and after decades of inaction the problems in water systems are enormous and will worsen if left unattended Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity Leaders in government the private sector and civil society determine these objectives and allocate human and financial resources to meet them Recognizing this responsibility they must act now Two volume set 336

Understanding Development Paul Hopper,2012-02-27 Drawing on a wide range of case studies from

across the globe this book explores such areas as health and population growth conflict and security global inequality and poverty fair trade and trade liberalization gender and education foreign aid and debt and sustainability and the environment This issues driven text focuses on the debates that have generated the most interest and passion among practitioners and non practitioners alike Always attentive to the contested and plural nature of the field it makes the case for a genuinely interdisciplinary approach which takes full account of the impact of globalization Publisher *Report on the Foreign Policy of the Czech Republic* République Tchèque. Ministerstvo zahraničních věcí, 2009-01-01 **Politics as Usual** Thomas W. Pogge, 2013-04-24 Worldwide human lives are rapidly improving Education health care technology and political participation are becoming ever more universal empowering human beings everywhere to enjoy security economic sufficiency equal citizenship and a life in dignity To be sure there are some specially difficult areas disfavoured by climate geography local diseases unenlightened cultures or political tyranny Here progress is slow and there may be set backs But the affluent states and many international organizations are working steadily to extend the blessings of modernity through trade and generous development assistance and it won t be long until the last pockets of severe oppression and poverty are gone Heavily promoted by Western governments and media this comforting view of the world is widely shared at least among the affluent Pogge s new book presents an alternative view Poverty and oppression persist on a massive scale political and economic inequalities are rising dramatically both intra nationally and globally The affluent states and the international organizations they control knowingly contribute greatly to these evils selfishly promoting rules and policies harmful to the poor while hypocritically pretending to set and promote ambitious development goals Pogge s case studies include the 1 day poverty measurement exercise the cosmetic statistics behind the first Millennium Development Goal the War on Terror and the proposed relaxation of the constraints on humanitarian intervention A powerful moral analysis that shows what Western states would do if they really cared about the values they profess The United Nations in Latin America Francis Adams, 2010-01-26 Francis Adams examines the United Nations efforts to promote sustainable in Latin America Adams analyzes the development work of various UN institutions and agencies that sponsor economic and social programs in the developing world as well as the UN s various funding initiatives global conferences and institutional goals Green Outcomes in the Real World Peter McManners, 2016-04-15 Over the last three decades the world economy has grown strongly on the back of globalization supported by the policies of free trade open markets and privatisation Support has also grown for the concept of sustainability meeting the needs of the present without compromising the ability of future generations to meet their own needs But as the Earth s systems come under increasing strain the inherent conflict between sustainability and globalization has been exposed Green Outcomes in a Real World examines the shift in thinking required to reconcile these two important areas of policy In this ground breaking book Peter McManners has coined the term Proximization to define a new policy framework The principles of Proximization are sustainability subsidiarity primacy of the

state and market economics and the application of these familiar concepts towards a sustainable globalised world is novel and different The author argues that adherence to the principles of proximization will return world society to a stable natural order and will mean changes Global commodity flows will reduce and barriers to migration will increase National governments will demand more control over their finances leading to restrictions on capital flows Indeed Peter believes that an element of selfish determination is needed The new world order will be sustainable by design Global organisations such as the UN national governments and global corporations will have to understand and apply a different paradigm The arguments in this book do not reflect the idealism or even naivety of some of the green movement This book is about hard edged reality presented by an author with huge experience and a deep understanding of the business perspective It will appeal to a wide range of professionals involved in setting policy and future direction for businesses governments and non governmental bodies as well as to those with an academic interest in business economics social and environmental issues and public policy

National Geographic Family Reference Atlas of the World National Geographic Society (U.S.),2010 A comprehensive world atlas covering all aspects of the Earth with over 1000 maps and illustrations *Millennium Development Goals* Matthew Clarke,Simon Feeny,2013-09-13 In the year 2000 the international community agreed to a framework to address global poverty This framework known as the Millennium Development Goals was time bound with an end date of 2015 With this end now in sight the international community is focusing on the achievement of these goals However it is also very important that consideration now turns to what will follow the MDGs after 2015 Millennium Development Goals Looking Beyond 2015 provides a critical analysis of the MDGs and discusses a range of issues that must be considered by the international community in determining what poverty alleviation framework might replace the MDGs This reflection is made even more imperative as the poverty landscape has shifted considerably since these original goals were made This book was originally published as a special issue of the Journal of the Asia Pacific Economy *Absolute Poverty and Global Justice* Michael Schramm,Thomas Pogge,2016-03-23 Absolute poverty causes about one third of all human deaths some 18 million annually and blights billions of lives with hunger and disease Developing universalizable norms aimed at tackling absolute poverty and the complex and multilayered problems associated with it this book considers the levels trends and determinants of absolute poverty and global inequality Examining whether much faster progress against absolute poverty is possible through reductions in national and global inequalities that produce economic growth for poor countries and households this book suggests that diverse moral views imply that international agencies as well as the citizens corporations and governments of affluent countries bear a moral responsibility to reduce absolute poverty In considering strategies of eradication through specific policies and structural reforms it is argued that because of its moral importance and requirement for only modest efforts and resources the goal of overcoming absolute poverty must be given much higher political priority by international agencies and governments of affluent countries Suggesting that these agencies

should be encouraged to facilitate and promote new initiatives this book concludes with a discussion of how such initiatives might be realized **Least Developed Countries and the WTO** H. Hawthorne, 2013-05-07 A norm of special treatment for LDCs created by the UN has spread to various international organisations including the WTO Within the WTO evidence of the institutionalization of the norm can be found both in the agreements and legal documents and the way in which the LDCs have been treated by other states Helen Hawthorne investigates how norms impact on negotiations in international organisations She shows that few studies of international organisations focus on the role of the weaker states in the organization the majority focus either on the major states or the emerging economies By ignoring the role of the poorer weaker states in the GATT WTO we are ignoring the history of these states in the organisation and do not get a true picture of the organization how it operates in relation to them and their impact on the organisation
