INTRODUCTION

The Model "30" provides the operator control on the console for an electric operation of a powerboat or diesel (diesel engine equipped with a hydraulic transmission).

The Model "30 TRIM" Control can be used on either dual or single engine and electric operation of a powerboat engine installation. Dual operation control for electric operation from both the cabin and the bridge can be obtained by using Model "30", "30M" and the "30M" Controls connected either in tandem or in parallel.

An emergency stop switch located in the "30" Assembly is recommended when used for electric operation. This stop switch should be placed in the "30" Assembly. This kit provides positive control that is forward, neutral and reverse.

Model "30" and "30 TRIM" controls can be used in combination to provide up/down control of the engine and electric operation (see Figure 2B-1).

The "30M" controls can also be used for dual engine operation.
