Xhosa and Russian Folktales Bertie Neethling, 2019-07-26 The purpose of this publication is to indicate that Xhosa iintsomi folktales are structured in such a way that many links or commonalities emerge when a comparison between tales is made. Orally transmitted literary forms had to endure much prejudice and were often not considered worthy of study. However, in many different cultures all over the world, the concept of oral literature and its functioning still exists. There are various forms of oral literature, but one of the best known is the folktale. Folklorist and formalist Vladimir Propp (1895-1970) aimed to describe the story structure of Russian folktales according to a linear sequence of the acts of the characters. Using one hundred folktales, he illustrated how the storylines of these tales are remarkably similar; identical actions are often performed only by different characters. The somewhat surprising and obvious links between Propp's material and Xhosa iintsomi prompted the choice of Propp's model as the departure point for this comparative study. Forty-five Xhosa folktales were chosen because of their literary quality and suitability to Propp's methodology as a tool to organize the Xhosa data on the grounds of structural features that characterize this genre.

Higher Education and Capacity Building in Africa Hanne Kirstine Adriansen,Lene Møller Madsen,Stig Jensen,2015-11-06 Higher education has recently been recognized as a key driver for societal growth in the Global South and capacity building of African universities is now widely included in donor policies The question is how do capacity building projects affect African universities researchers and students Universities and their scientific knowledges are often seen to have universal qualities therefore capacity building may appear straight forward Higher Education and Capacity Building in Africa contests such universalistic notions Inspired by ideas about the geography of scientific knowledge it explores what role
