IMPORTANT INSTRUCTIONS:

Read the questions carefully.

All the questions are compulsory.

Internal choice has been given in a few questions, answer accordingly.

Section-A [Reading]

Q.1 Read the given passage carefully.

There are wild dogs and pet dogs. Pet dogs are helpers and friends to people. There were no pet dogs 15,000 years ago. Men and women learned how to work with dogs. Dogs helped humans travel from Asia to North America 10,000 years ago by *pulling* sleds in the snow. People say dogs are "man's best friend." They help with farming. They help with hunting. They help with fishing. They can pull things for people. They can help find things. There are many colours of dogs. There are white dogs, gray dogs, black dogs, and brown dogs. A dog's *fur* can be short or long. Dogs have curly hair or *straight* fur. There are very small dogs. They are only 6-8 inches tall. There are very big dogs. They are about 3 feet tall. Some dogs can see well. Some dogs do not see very well. All dogs can hear well. They can hear sounds that people cannot hear. They can hear high sounds and low sounds. They can hear sound very far away. All dogs can smell very well. They can smell 40 times better than *humans*! Dogs live 5 to 13 years, but some dogs live much longer. One dog lived to be 24 years old!

On the basis of your reading of the passage, choose the correct answers for the following questions. (1×5=5)

Iais Sample Paper For Class 5:

The Geneva Papers Christophe Courbage, 2016-04-29 In January 1976 Raymond Barre the first President of The Geneva Association and Orio Giarini its first Secretary General founded The Geneva Papers on Risk and Insurance with the main goal of supporting and encouraging research in the economics of risk and insurance At that time research in the field of insurance was still embryonic and insurance was regarded as peripheral social activity When sustained economic growth gained traction the function of insurance gradually emerged as a key contributor to economic development By integrating uncertainty into economic theory and benefiting from the progress of both financial economics and decision theory research developed further in the field of insurance economics and risk management and is now prolific The Geneva Papers on Risk and Insurance undeniably contributed to this evolution and its impact on research in insurance has largely exceeded what its two founding members could have expected This volume is a special collection of papers celebrating 40 Years of The Geneva Papers on Risk and Insurance The collection looks back at the storied history of The Geneva Papers on Risk and Insurance and features papers from some of the esteemed authors who have contributed to the journal in its lifetime This collection of papers highlights just a few of the many themes addressed in the papers published by the journal since it was created Nevertheless the selection exemplifies the richness and variety of topics the field of insurance covers The Impact of International Regulatory Standards on the Competitiveness of U.S. Insurers United States. Congress. House. Committee on Financial Services. Subcommittee on Housing and Insurance, 2015

Research Handbook on International Insurance Law and Regulation Julian Burling, Kevin Lazarus, 2023-12-11 This thoroughly revised second edition of the Research Handbook on International Insurance Law and Regulation provides an updated assessment of the insurance industry in an international context featuring 30 chapters of which half are new for this edition written by expert academics and practising lawyers

International Banking Regulation: Law, Policy and Practice George Walker, 2001-12-06 This work offers a comprehensive examination of the development and structure of the provisions for the control of international financial markets It explores the background to the major financial crises of the late 20th century and the nature of the global response

Public Governance in the Age of Globalization Karl-Heinz Ladeur, 2017-05-15 Globalization and its relationship to public governance is one of the key issues of our time In this book experts from a number of disciplines attempt to define what these two terms mean and perhaps even more importantly what they do not Taking as a starting point that globalization is neither the take over of political power by multi national stateless enterprises nor the chaotic unstructured process of dissolution of public order the contributors suggest that what is occurring is more institutionalized than many critics would admit It is argued that there are important transnational and supra national elements of a new public order which remain beyond the traditional borders of the state but not completely beyond the state as such Globalization as opposed to former developments in the internationalization of the economy is characterized by its

transnational form i.e. it is based on exchange processes which to a greater or lesser degree bypass both the state and the traditional international character of the world economy of the past

2021 Financial Sector Assessment Program Review—Background Paper On Traction International Monetary Fund. Monetary and Capital Markets Department, 2021-05-28 A key criterion for judging the success of the Financial Sector Assessment Program FSAP is the extent to which the program has enhanced the IMF's engagement with policymakers and influenced country policies This reflects the fact that achieving one of the program's key objectives reducing the frequency and severity of financial crises rests on its ability to encourage policy action by country authorities either directly or through other bilateral and multilateral activities The traction of FSAPs thus reflects the degree to which the program is seen as useful by the authorities and the effect it has in shaping the domestic policy agenda And the impact that the FSAP may have on wider domestic and international audiences

European Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza, 2019-12-26 Mirroring the long established structure of the financial industry EU financial regulation as we know it today approaches banking insurance and investment services separately and often divergently In recent decades however the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries As the contours of the traditional tripartition in the financial industry have faded the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective For each specific research theme including prudential regulation corporate governance and conduct of business rules the similarities as well as gaps overlaps and unjustifiable differences between banking securities and insurance regulation are clearly presented and discussed This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes

The Principle of Proportionality, Solvency II and Captives Marta Ostrowska, 2025-03-05 This

book offers an in depth analysis of the principle of proportionality in the EU insurance regulatory regime It takes a critical look at how proportionality has been implemented in Solvency II and tests its effectiveness on captive re insurance undertakings Given their unique business model captives are considered the primary beneficiary of proportionality and therefore offer the perfect litmus test for the principle s effectiveness In a world characterized by overregulation and increasingly complex financial markets governments and policymakers face the challenge of regulating markets without hindering their growth As one size fits all approaches have long since been recognized as detrimental the EU is seeking to develop a regulatory technique which allows more individual regulatory treatment while ensuring a level playing field The first revolutionary step towards this goal was taken in Solvency II Directive 2009 138 EC which introduced a principle of proportionality to the EU insurance market The principle is a unique tool which makes it possible to adjust the requirements of the Solvency II framework to the nature scale and complexity of each individual insurance undertaking s risk profile It is intended to help remove an unnecessary regulatory burden for insurance undertakings and to prevent the proliferation of regulations in general However the practical implementation of proportionality is not without its share of obstacles The principle s generic nature and the lack of guidance have caused a great deal of confusion regarding its practical application and prevented insurance undertakings from using its benefits to the fullest Consequently the principle of proportionality has been subject to revision within the first Solvency II review process The book will benefit captive owners captive managers regulators supervisors practitioners academics students and more generally all those involved with or interested in the insurance market
