International Aeronautical and Maritime Search and Rescue Manual, 2013 **Decision Modes in Complex Task Environments**

Norbert Steigenberger, Thomas Lübcke, Heather Fiala, Alina Riebschläger, 2017-05-25 Despite intense research on decision making in action we still know little about when decision makers rely on deliberate vs intuitive decision making in decision situations under complexity and uncertainty Building on default interventionist dual processing theory this book studies decision making modes deliberate vs intuitive in complex task environments contingent on perceived complexity experience and decision style preference We find that relatively inexperienced decision makers respond to increases in subjective complexity with an increase in deliberation and tend to follow their decision style preference Experienced decision makers are less guided by their decision preference and respond to increases in subjective complexity only minimally This book contributes to a developing stream of research linking decision making with intra personal and environmental properties and fosters our understanding of the conditions under which decision makers rely on intuitive vs deliberate decision modes In doing so we go one step further towards a comprehensive theory of decision making in action

Preventing Terrorist Attacks at Sea Robin Bowley, 2022-12-23 Over recent decades it has been widely recognised that terrorist attacks at sea could result in major casualties and cause significant disruptions to the free flow of international shipping After discussing the overlaps and distinctions between piracy and maritime terrorism this book considers how the International Ship and Port Facility Security Code and other vessel identification and tracking measures in the 1974 International Convention for the Safety of Life at Sea would be likely to reduce the risk of terrorist attacks at sea It explains how the 1982 United Nations Convention on the Law of the Sea is less than clear on the powers of states to protect offshore installations submarine cables and pipelines from interference by terrorists In light of these uncertainties it considers how the 2005 Protocol to the Convention for the Suppression of Unlawful Acts Against Maritime Navigation the

doctrine of necessity and states inherent self defence rights might apply in the maritime security context A significant contribution of the book is the formulation of the Maritime Terrorism Threat Matrix which provides a structured framework for examining how maritime terrorism incidents have occurred and might occur in the future The book also examines the relevant national maritime security legislation for preventing maritime terrorist attacks in the United Kingdom and in Australia The book concludes by formulating guidelines for the unilateral interdiction of suspected terrorist vessels in exceptional circumstances and recommending priorities for governments and international maritime industries to focus on in order to reduce the risk for terrorist attacks at sea It will be of interest to those working in the areas of Law and Terrorism

Law of the Sea Maritime Law and Insurance and International Law **Preventing the Maritime Facilitation of Terrorism** Robin Bowley, 2022-12-30 In the aftermath of the 9 11 attacks concerns that terrorists might utilise vessels to transport weaponry terrorist operatives and or to finance their activities prompted several international legal developments This book evaluates the extent to which the international maritime security measures developed following the 9 11 attacks would be likely to prevent the utilisation of vessels to facilitate terrorist activities It considers the likely effectiveness of the International Ship and Port Facility Security Code for improving vessel and port security and the 2005 Protocol to the Convention for the Suppression of Unlawful Acts Against Maritime Navigation in facilitating the interdiction of suspected terrorist vessels It also explains how the US led Proliferation Security Initiative a cooperative effort through which participant governments agree to prevent the illicit transfers of Weapons of Mass Destruction and related materials has provoked debate about the legality of vessel interdictions under the United Nations Convention on the Law of the Sea the LOSC After exploring alternative interpretations of the LOSC and states self defence rights under Article 51 of the Charter of the United Nations it formulates suggested guidelines for the unilateral interdiction of suspected terrorist support vessels in exceptional circumstances The book also discusses the relevant recommendations by the OECD s Financial Action Taskforce for preventing the financing of terrorism and the national maritime security legislation for preventing the maritime facilitation of terrorist activities in the United Kingdom and in Australia The book concludes by emphasising the importance of the continual active implementation of ship port facility and supply chain security measures and of further enhancing international cooperation to facilitate vessel interdictions It will be of interest to those working in the areas of Law and Terrorism

technologies and addressing future conflict new U S Naval maritime approaches distributed Maritime Operations DMO and the newest U S Navy operational concept This is a great resource for Naval officers in the ISR Intelligence Space ASW EW and Surface Warfare disciplines who seek an in depth understanding of advanced ISR operations and technologies as well as Navy and industry managers and engineers planning and developing advanced naval systems **Responses to Sea**

Migration and the Rule of Law Katia Bianchini,2024-08-22 In the current debates on sea migration there is a dearth of works drawing on the rule of law This important book addresses this failing Considering the question from that conceptual framework it is able to broaden the sometimes fragmented and incomplete perspective of existing scholarship The book takes as its central case study the experience of Italy exploring the legal issues at play there and its institutional practices and policies From here its focus broadens out to the wider EU experience looking in particular at those problems common to southern EU states such as failures and delays in assisting migrants in distress at sea and contested legal grounds and practices concerning interceptions at sea It combines both legal and empirical data charting both the black letter law and how it operates in practice In a field as complex as this this clarity is key it allows lawyers political scientists and policymakers to truly engage with the challenges sea migration poses today *Terrorism, Security and Development in South Asia* M. Raymond Izarali,Dalbir Ahlawat,2021-04-28 This book provides a rich analysis of the actors and organizations to reflect on the antecedents and trajectories of terrorism and insurgency in South Asia and the different countermeasures adopted by the countries to deal with the security and developmental challenges South Asia is a complex geography that has been both a victim and a playing field for indigenous insurgencies and domestic and transnational terrorist movements The contributors to this volume explore how this situation has posed serious challenges to the sovereignty of the states to national and human security and to the socioeconomic fabric of the communities and to the ethnic and religious cohesion The book provides detailed studies of country cases on terrorism security and insurgencies and it underlines the national regional and global implications of the threats that emanate from this region Presenting an opportunity to diversify away from a Western centric focus on terrorism and security this book will be valuable to researchers in political science criminology defense and security studies and to policy makers and think tanks
