Structured Cabling Services

"Building Scalable Networks"

Are you facing these Infrastructure Challenges?

- Need to create a network infrastructure that is scalable yet easy to manage?
- Are there frequent changes to your network infrastructure that need to be addressed regularly?
- Do you have plans to expand your network infrastructure?
- Do you want an expert's advice on how to standardize your network infrastructure?

If your answer is yes, then Netsol's Structured Cabling Services is the solution...

Why do you need a scalable Structured Cabling System?

In today's competitive business world, enterprises must be able to respond quickly to changes occurring in the market place. For some this means modernizing their data center to meet strict new regulatory requirements while for others it is all about shortening the deployment cycle for new services. All of this adds up to an enterprise's efforts in retaining existing customers and acquiring new ones.

Cabling is the longest life cycle component of the entire network, outlived only by the building shell. A standards compliant cabling system can "future-proof" your network and guarantee continued application support. The evolution of networks continues at a rapid pace, enabling network-wide applications to be deployed to take advantage of networked computing resources in new and innovative ways. When properly deployed and managed, it can have a significant impact on efficiency including peer-to-peer networks, clustering, and grid computing.

With all the challenges that confront your business, a structured cabling system can help you –

- Alleviate the workflow disruption and network downtime associated with office restructuring
- Accommodate frequent changes
- Provide a universal platform for an overall information systems strategy
- Flexible cabling infrastructure to support multiple voice, data, video and multimedia systems
