**The ICE Conditions of Contract** Brian Eggleston, 2008-04-15. The ICE Conditions continue to be the dominant form of contract for civil engineering despite the growing importance of the New Engineering Contract. The Seventh Edition of the ICE Conditions published in 1999 introduced a number of changes including incorporating some of the concepts of the Latham Report, amending certain provisions of the Sixth Edition which had attracted criticism, rectifying conspicuous omissions from the text of earlier editions of the contract, correcting small errors and faults from the previous edition, modernising certain provisions and terms. Brian Eggleston, whose previous book on the ICE Conditions was described as likely to become the authoritative reference source for the Sixth Edition, examines the contract clause by clause from a practical and legal viewpoint. There is extensive coverage of case law. Written by an experienced civil engineer and recognized authority on construction contracts, this book is an essential guide.

**Adjudication in Construction Contracts** John Redmond, 2008-04-15. Adjudication was introduced in construction contracts as a requirement of the Housing Grants, Construction and Regeneration Act in 1998 to tackle the large number of disputes which dog most projects. Provisions for
