

Excel 2010 is the newest version of Microsoft Office. Spreadsheet applications are used to analyze, organize, and manage numbers and data.

The **Quick Access Toolbar** gives easy access to common commands such as Undo and Save, and saves screen space by integrating it with the title bar. Click the drop-down arrow to choose which commands are visible.

Backstage is a new feature that helps manage files. This is where printing, saving, managing different versions, and share is available. It is incorporated into the File tab. Please see back of sheet for more in-depth detail.

The **Ribbon** is the main toolbar of Excel 2010. Each tab contains the majority of commands most useful to work with. Collapse and open the Ribbon by clicking the **Collapse Ribbon** arrow. Unlike previous versions, the items in the Ribbon are now customizable. Please see back of sheet for more in-depth detail.

The **Zoom** function adjusts the size of the view of the page. To adjust the size move the slider right or left.

The **Formula Bar** in Excel 2010 displays the cell address and the contents — data or a formula — of the current cell. Use the Formula bar to enter or edit formulas and cell data and assign names to cells.

New Features We Like:

- **Customizable Ribbon** allows users to choose what commands and tabs you want displayed.
- **Backstage** control over managing documents.
- **Slicers** are visual controls that allow users to quickly and easily filter your data in Pivot Tables. They float above the grid, like charts and shapes.
- **Sparklines** summarize data found in each line of a table using single-cell graphs.
