HOW TO USE

1. A sensitivity control is installed on the bottom of the mic stand. By turning it to the "H" or "L" position, the sensitivity will increase or decrease, respectively. Adjust the control so as to get the proper sensitivity considering the distance to the mic, the loudness of your voice and the environmental conditions.
2. The wind screen not only prevents background noise due to wind, but also protects the mic. Unless required, do not remove the screen from the mic.
3. In order to operate the microphone, connect its plug to the mic socket on a transceiver (or transmitter).

4. To transmit, press the PTT switch downward. When it is released, the transceiver will return to the receive condition. For a long transmission, pull the PTT switch backwards, while pressing it down until the switch is locked and it will remain in that position until it is pushed forward and released. Refer to the following chart.
