Ieb Past Papers Business Studies:

State, Market and Society in an Emerging Economy Quamrul Alam, Rizwan Khair, Asif M. Shahan, 2023-07-26 The economic and social development that Bangladesh has achieved in the past two decades has made Bangladesh a development paradox. This book tries to explain this paradox through a political economy lens. The book explains the linkages between the state changing society and emerging private sector and examines whether the social transformation taking place in Bangladesh has the potential to live up to the expectations of a middle income country. The early part of the book unravels the myriad relations between the state, society and market to project the aspirations of a newly independent nation. It analyzes how political turmoil, militarization of politics, politicization of institutions, reforms, initiatives, industrial and social development policies and the power nexus influenced the nature of the political economy of Bangladesh. The book goes on to examine how domestic appetite for capital and raw materials, the digital revolution and the capacity of the local market to absorb expanded economic activities have created an environment that catalyzes innovation and entrepreneurship. The book also explains how the country has attempted to transform from an agrarian to a manufacturing based economy with rapid growth in the ready made garment industry, pisciculture, pharmaceuticals and the ICT sector. Bangladesh's journey from an emerging economy towards a developed country would interest those researching on development economics and those in policy making.

The Oxford Handbook of International Tax Law Florian Haase, Georg Kofler, 2023-10-13 International Tax Law is at a turning point. Increased tax transparency, the tackling of Base Erosion and Profit Shifting (BEPS), the reconstruction of the network of bilateral tax treaties, the renewed discussion about a fair and efficient allocation of taxing rights between States in a global digitalized economy and the bold push for minimum corporate taxation are some expressions of this shift. This new era also demonstrates the increased influence of international standard setters such as the OECD, the UN and the EU. Each of these developments alone has the potential of being disruptive to the traditional world of international tax law but together they have the potential to reshape the international tax system. The Oxford Handbook of International Tax Law provides a comprehensive exploration of these key issues which will shape the future of tax law. Divided into eight parts, this handbook traces the history of international tax law from its earliest days until the present, including reflections on the developments that have characterized the last one hundred years. The second section places tax law within the broader international context, considering how it relates to public and private international law as well as corporate, trade and criminal law. Sections three and four consider key legal principles and issues such as regional tax treaty models, OECD dispute resolution and transfer pricing versus formulary apportionment. Subsequent analysis places these issues within their European and cross border contexts, providing an assessment of the role of the ECJ, state aid and cross border VAT. Section seven broadens the scope of this analysis, asking how trends in recent major economies and regions have helped shape the current outlook. The final section considers emerging issues and the future of international tax law. With over sixty authors
