Mobile Ad Hoc Networking Stefano Basagni, Marco Conti, Silvia Giordano, Ivan Stojmenovic, 2013-02-07 An excellent book for those who are interested in learning the current status of research and development and who want to get a comprehensive overview of the current state of the art E Streams This book provides up to date information on research and development in the rapidly growing area of networks based on the multihop ad hoc networking paradigm It reviews all classes of networks that have successfully adopted this paradigm pointing out how they penetrated the mass market and sparked breakthrough research Covering both physical issues and applications Mobile Ad Hoc Networking Cutting Edge Directions offers useful tools for professionals and researchers in diverse areas wishing to learn about the latest trends in sensor actuator and robot networking mesh networks delay tolerant and opportunistic networking and vehicular networks Chapter coverage includes Multihop ad hoc networking Enabling technologies and standards for mobile multihop wireless networking Resource optimization in multiradio multichannel wireless mesh networks QoS in mesh networks Routing and data dissemination in opportunistic networks Task farming in crowd computing Mobility models topology and simulations in VANET MAC protocols for VANET Wireless sensor networks with energy harvesting nodes Robot assisted wireless sensor networks recent applications and future challenges Advances in underwater acoustic networking Security in wireless ad hoc networks Mobile Ad Hoc Networking will appeal to researchers developers and students interested in computer science electrical engineering and telecommunications **Reflections on the History of Computing** Arthur Tatnall, 2012-11-28 This book is a collection of refereed invited papers on the history of computing from the 1940s to the 1990s with one paper going back to look at Italian calculating computing machines from the first century to the 20th century The 22 papers cover a wide range of computing related topics such as specific early computer systems their construction their use and their users software programming and operating systems people involved in the theory design and use of these computers computer education and conservation of computing technology Many of the authors were actually involved in the events they describe

and share their specific reflections on the history of computing *Smart Clothing* Gilsoo Cho,2009-12-23 GPS embedded clothing for finding children or skiers when they are lost bio monitoring smart shirts and vests that monitor a patient's vital signs are no longer science fiction but science fact It is quite likely that within 20 or 30 years computers telephones and televisions will be a part of our intimate clothing Covering the whole design *Introduction to Scientific Visualization* Helen Wright,2007-08-03 AboutThisBook This book was first suggested to Springer in 2004 though its origins go back to changes made two years earlier to the structure of the University of Hull's Computer Science programme At the same time my own visualization search was leading towards a systematic view of data and techniques that I felt could be educationally valuable In 2003 I thus sat down with some trepidation to write a visualization course founded on research in the area but nonetheless accessible to students This course could however involve no mathematics beyond GCSE in line with university admissions practices of that time Writing the course involved generating many new illustrations in the form of both line drawings and visualization screenshots and wishing to get maximum mileage out of this effort the idea of writing a book to accompany the course came about At the University of Hull our practical visualization teaching is based on IRIS Explorer an application builder type package from NAG Ltd Originally this book was to have been both an introduction to visualization and a handbook for beginners in IRIS Explorer with virtual laboratories running throughout it to illustrate certain points Following comments from reviewers however its emphasis has changed **Grid and Cloud Computing: Concepts, Methodologies, Tools and Applications** Management Association, Information Resources,2012-04-30 This reference presents a vital compendium of research detailing the latest case studies architectures frameworks methodologies and research on Grid and Cloud Computing Handbook of Research on P2P and Grid Systems for Service-Oriented Computing: Models, Methodologies and Applications Antonopoulos, Nick,Exarchakos, Georgios,Li, Maozhen,Liotta, Antonio,2010-01-31 Addresses the need for peer to peer computing and grid paradigms in delivering efficient service oriented computing **Multiprocessor Scheduling for Real-Time Systems** Sanjoy Baruah,Marko Bertogna,Giorgio Buttazzo,2015-01-02 This book provides a comprehensive overview of both theoretical and pragmatic aspects of resource allocation and scheduling in multiprocessor and multicore hard real time systems The authors derive new abstract models of real time tasks that capture accurately the salient features of real application systems that are to be implemented on multiprocessor platforms and identify rules for mapping application systems onto the most appropriate models New run time multiprocessor scheduling algorithms are presented which are demonstrably better than those currently used both in terms of run time efficiency and tractability of off line analysis Readers will benefit from a new design and analysis framework for multiprocessor real time systems which will translate into a significantly enhanced ability to provide formally verified safety critical real time systems at a significantly lower cost **A Practical Handbook for Software Development** N. D. Birrell,Martyn A. Ould,M. A. Ould,1988-02-11 The designer of a software system like the architect of a building needs to be aware of the construction techniques available and to choose the

ones that are the most appropriate This book provides the implementer of software systems with a guide to 25 different techniques for the complete development processes from system definition through design and into production The techniques are described against a common background of the traditional development path its activities and deliverable items In addition the concepts of metrics and indicators are introduced as tools for both technical and managerial monitoring and control of progress and quality The book is intended to widen the mental toolkit of system developers and their managers and will also introduce students of computer science to the practical side of software development With its wide ranging treatment of the techniques available and the practical guidance it offers it will prove an important and valuable work

Vision Systems Goro Obinata,Ashish Dutta,2007-06-01 Computer Vision is the most important key in developing autonomous navigation systems for interaction with the environment It also leads us to marvel at the functioning of our own vision system In this book we have collected the latest applications of vision research from around the world It contains both the conventional research areas like mobile robot navigation and map building and more recent applications such as micro vision etc The first seven chapters contain the newer applications of vision like micro vision grasping using vision behavior based perception inspection of railways and humanitarian demining The later chapters deal with applications of vision in mobile robot navigation camera calibration object detection in vision search map building etc

Data Clustering: Theory, Algorithms, and Applications, Second Edition Guojun Gan,Chaoqun Ma,Jianhong Wu,2020-11-10 Data clustering also known as cluster analysis is an unsupervised process that divides a set of objects into homogeneous groups Since the publication of the first edition of this monograph in 2007 development in the area has exploded especially in clustering algorithms for big data and open source software for cluster analysis This second edition reflects these new developments covers the basics of data clustering includes a list of popular clustering algorithms and provides program code that helps users implement clustering algorithms *Data Clustering Theory Algorithms and Applications Second Edition* will be of interest to researchers practitioners and data scientists as well as undergraduate and graduate students

Algorithms and Parallel Computing Faye Gebali,2011-04-19 There is a software gap between the hardware potential and the performance that can be attained using today's software parallel program development tools The tools need manual intervention by the programmer to parallelize the code Programming a parallel computer requires closely studying the target algorithm or application more so than in the traditional sequential programming we have all learned The programmer must be aware of the communication and data dependencies of the algorithm or application This book provides the techniques to explore the possible ways to program a parallel computer for a given application

Image Processing: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2013-05-31 Advancements in digital technology continue to expand the image science field through the tools and techniques utilized to process two dimensional images and videos *Image Processing Concepts Methodologies Tools and Applications* presents a collection of research on this multidisciplinary

field and the operation of multi dimensional signals with systems that range from simple digital circuits to computers This reference source is essential for researchers academics and students in the computer science computer vision and electrical engineering fields Designing Network On-Chip Architectures in the Nanoscale Era Jose Flich,Davide Bertozzi,2010-12-18 Going beyond isolated research ideas and design experiences Designing Network On Chip Architectures in the Nanoscale Era covers the foundations and design methods of network on chip NoC technology The contributors draw on their own lessons learned to provide strong practical guidance on various design issues Exploring the design process of the **Asynchronous On-Chip Networks and Fault-Tolerant Techniques** Wei Song,Guangda Zhang,2022-05-10 Asynchronous On Chip Networks and Fault Tolerant Techniques is the first comprehensive study of fault tolerance and fault caused deadlock effects in asynchronous on chip networks aiming to overcome these drawbacks and ensure greater reliability of applications As a promising alternative to the widely used synchronous on chip networks for multicore processors asynchronous on chip networks can be vulnerable to faults even if they can deliver the same performance with much lower energy and area compared with their synchronous counterparts faults can not only corrupt data transmission but also cause a unique type of deadlock By adopting a new redundant code along with a dynamic fault detection and recovery scheme the authors demonstrate that asynchronous on chip networks can be efficiently hardened to tolerate both transient and permanent faults and overcome fault caused deadlocks This book will serve as an essential guide for researchers and students studying interconnection networks fault tolerant computing asynchronous system design circuit design and on chip networking as well as for professionals interested in designing fault tolerant and high throughput asynchronous circuits **Data Compression** David Salomon,2013-03-09 Data compression is one of the most important techniques in computing engineering From archiving data to CD ROMs and from coding theory to image analysis many facets of computing make use of data compression in one form or another This book is intended to provide an overview of the many different types of compression it includes a taxonomy an analysis of the most common systems of compression discussion of their relative benefits and disadvantages and their most common usages Readers are presupposed to have a basic understanding of computer science essentially the storage of data in bytes and bits and computing terminology but otherwise this book is self contained The book divides naturally into four main parts based on the main branches of data compression run length encoding statistical methods dictionary based methods and lossy image compression where in contrast to the other techniques information in the data may be lost but an acceptable standard of image quality retained Detailed descriptions of many of the most well known compression techniques are covered including Zip BinHex Huffman coding GIF and many others
