

Biology Test- Chapter 11: Introduction to Genetics

Multiple Choice

Identify the choice that best completes the statement or answers the question.

- Gregor Mendel used pea plants to study
 - flowering.
 - gamete formation.
 - the inheritance of traits.
 - cross-pollination.
- Offspring that result from crosses between true-breeding parents with different traits
 - are true-breeding.
 - make up the F_2 generation.
 - make up the parental generation.
 - are called hybrids.
- The chemical factors that determine traits are called
 - alleles.
 - traits.
 - genes.
 - characters.
- Gregor Mendel concluded that traits are
 - not inherited by offspring.
 - inherited through the passing of factors from parents to offspring.
 - determined by dominant factors only.
 - determined by recessive factors only.
- When Gregor Mendel crossed a tall plant with a short plant, the F_1 plants inherited
 - an allele for tallness from each parent.
 - an allele for tallness from the tall parent and an allele for shortness from the short parent.
 - an allele for shortness from each parent.
 - an allele from only the tall parent.
- The principle of dominance states that
 - all alleles are dominant.
 - all alleles are recessive.
 - some alleles are dominant and others are recessive.
 - alleles are neither dominant nor recessive.
- When Gregor Mendel crossed true-breeding tall plants with true-breeding short plants, all the offspring were tall because
 - the allele for tall plants is recessive.
 - the allele for short plants is dominant.
 - the allele for tall plants is dominant.
 - they were true-breeding like their parents.
- A tall plant is crossed with a short plant. If the tall F_1 pea plants are allowed to self-pollinate,
 - the offspring will be of medium height.
 - all of the offspring will be tall.
 - all of the offspring will be short.

[Am I My Genes?](#) Robert L. Klitzman M.D., 2012-03-01 In the fifty years since DNA was discovered we have seen extraordinary advances For example genetic testing has rapidly improved the diagnosis and treatment of diseases such as Huntington's cystic fibrosis breast cancer and Alzheimer's But with this new knowledge comes difficult decisions for countless people who wrestle with fear about whether to get tested and if so what to do with the results Am I My Genes shows how real individuals have confronted these issues in their daily lives Robert L Klitzman interviewed 64 people who faced Huntington's Disease breast and ovarian cancer or Alpha 1 antitrypsin deficiency The book describes often in the person's own words how each has wrestled with the vast implications that genetics has for their lives and their families Klitzman shows how these men and women struggle to make sense of their predicament and its causes They confront a series of quandaries whether to be tested whether to disclose their genetic risks to parents siblings spouses offspring friends doctors insurers employers and schools how to view and understand themselves and their genetics what treatments if any to pursue whether to have children adopt screen embryos

or abort and whether to participate in genetic communities In the face of these uncertainties they have tried to understand these tests and probabilities avoid fatalism anxiety despair and discrimination and find hope meaning and a sense of wholeness Forced to wander through a wilderness of shifting sands they chart paths that many others may eventually follow Klitzman captures here the voices of pioneers some of the first to encounter the personal dilemmas introduced by modern genetics Am I My Genes is an invaluable account of their experience one that will become all the more common in the coming years An extraordinary exploration probing the many roles and implications of genetics in our lives today Filled with astonishing insights this riveting book is vital reading for us all Paula Zahn Klitzman lucidly discusses the moral and psychological complexities that come in the wake of genetic testing An important book for anyone who has the genes for pathology which is all of us and I recommend it highly Kay Redfield Jamison author of An Unquiet Mind An illuminating voyage through the medical familial and existential quandaries faced by those of us at genetic risk Thomas H Murray President and CEO The Hastings Center
