of institutionalised order in modern capitalist societies with highly developed division of labour Via thorough critique and reconstruction of neo institutionalist theory classical social theories and critical ideology theory The Invisible Order introduces the first relational theory of social institutions to explain in detail how individuals end up encountering institutions as objective Thus synthesising integrative and conflicting social relations the work calls into question deeply rooted understandings in which society is variously construed as spontaneous equilibrium solely conflict driven or a set of agent based constructions It offers a new take on the age old questions of classical and critical social theory and on the fundamentals of institutional and organisational theory alike This timely and useful relational examination of social institutions reveals how complex societies can keep functioning even though their orders are constantly contradicted by multiple disordering endeavours and tendencies

*The Responsible Economy* Jefferson Frank, 2015-05-08 After the financial crisis and Great Recession some have called for replacing standard economic theory by heterodox models based upon behavioural approaches The Responsible Economy argues that there is nothing wrong with economic theory Instead the problem has been a devil s pact of simplistic pro market economics combined with simplistic Keynesian monetary policy This book revisits the fundamental theorems in economics that state the conditions for markets to achieve efficiency It has long been known that there are limitations of markets in dealing with externalities increasing returns to scale and monopoly The role of information in the economy was developed in economic theory in the 1970s onwards and in a world of imperfect and asymmetric information markets perform poorly Managers of firms engage in short termism take on excessive risk and misstate their own and their firm s performance While finance theory makes clear that much of the activity in the financial services sector is of no economic value and represents wasteful financial engineering In this real world it is economically inefficient for firms to maximise shareholder value On the macroeconomics side monetary expansion cannot be an effective substitute for addressing real problems of infrastructure and education investment This book maintains that markets work best if individuals and firms behave ethically and responsibly Employment should be a long term relationship firms should pay living wages produce good products at a fair price and pay their share of taxes Where these standards don t hold governments should not try to micromanage through regulation but set up simple and straightforward policies
