model for assessing and increasing digital sovereignty Martin Kaloudis, 2024-03-11 Die Dissertation *Europe's future a model for assessing and increasing digital sovereignty* von Martin Kaloudis an der Mendel University in Brno beschäftigt sich mit der digitalen Souveränität europäischer Staaten. Sie thematisiert die Abhängigkeit der EU-Staaten von Technologien und Rohstoffen aus Nicht-EU-Ländern, insbesondere die Abhängigkeit von digitalen Technologien aus China und den USA, und untersucht mögliche Stellhebel zur Beherrschbarkeit von Abhängigkeiten von nicht-europäischen Technologien. Die Dissertation entwickelt ein Modell zur Bewertung der digitalen Souveränität, fokussiert auf die EU und schlägt eine Definition des Begriffs vor. Ein wichtiger Bestandteil ist ein komparativer Index für digitale Souveränität, der auf sekundären Daten basiert und mittels quantitativer Methoden verifiziert und validiert wird. Die Ergebnisse des Indexes zeigen, dass EU-Staaten in Sachen digitaler Souveränität Entwicklungspotenziale haben. Aus der Analyse werden handlungsleitende Maßnahmen abgeleitet, wie etwa höhere Investitionen in Start-ups, Förderung des Exports von IKT-Dienstleistungen und Verringerung von Handelsbarrieren im digitalen Bereich. Die Dissertation betont, dass die konsequente Umsetzung dieser Maßnahmen zur Stärkung der digitalen Souveränität der EU-Staaten beitragen kann. *Empirical Research and Writing* Leanne C.

Powner, 2014-11-04 *Students can easily misstep when they first begin to do research* Leanne C. Chapter by chapter, students are guided through the key steps in the research process. Series Analysis for the Social Sciences Janet M. Box-Steffensmeier, John R. Freeman, Matthew P. Hitt, Jon C. W. Pevehouse, 2014-12-22 Time series or longitudinal data are ubiquitous in the social sciences. Unfortunately, analysts often treat the time series properties of their data as a nuisance rather than a substantively meaningful dynamic process to be modeled and interpreted. *Time Series Analysis for the Social Sciences* provides accessible, up-to-date instruction and examples of the core methods in time series econometrics. Janet M. Box-Steffensmeier, John R. Freeman, Jon C. Pevehouse, and Matthew P. Hitt cover a wide range of topics, including ARIMA models, time series regression, unit root diagnosis, vector autoregressive models, error correction models, intervention models, fractional integration, ARCH models, structural breaks, and forecasting. This book is aimed at researchers and graduate students who have taken at least one course in multivariate regression. Examples are drawn from several areas of social science, including political behavior, elections, international conflict, criminology, and comparative political economy. *The Assumptions Economists Make* Jonathan Schlefer, 2012-03-20 Economists make confident assertions in op-ed columns and on cable news, so why are their explanations at odds with equally

confident assertions from other economists And why are all economic predictions so rarely borne out Harnessing his frustration with this contradiction Schlefer set out to investigate how economists arrive at their opinions *Knowledge and Networks* Johannes Glückler,Emmanuel Lazega,Ingmar Hammer,2017-01-05 This book discusses a core question in many fields of the social sciences namely how to create share and adopt new knowledge It creates an original space for conversation between two lines of research that have developed largely in parallel for a long time social network theory and the geography of knowledge This book considers that relational thinking has become increasingly important for scholars to capture societal outcomes by studying social relations and networks whereas the role of place space and spatial scales has been somewhat neglected outside an emergent geography of knowledge The individual contributions help integrate network arguments of connectivity geographical arguments of contiguity and contextuality into a more comprehensive understanding of the ways in which people and organizations are constrained by and make use of space and networks for learning and innovation Experts in the fields of geography sociology economics political science psychology management and organizational studies develop conceptual models and propose empirical research that illustrates the ways in which networks and geography play together in processes of innovation learning leadership and power This book is open access under a CC BY 4 0 license

Social Purpose, Commercialization, and Innovations in Microfinance Md Aslam Mia, 2022-03-07 This book analyses three key aspects of microfinancing namely social purpose commercialization and innovations and examines through a global perspective how these aspects helped and diverted microfinance institutions towards the attainment of their dual goals over the last twenty years Since microfinance remains informal in nature for most economies not all financial innovations are suitable for its needs Hence the arguments in the book put forth an important challenge to the advocates of innovations and subsequently highlight why MFIs should be cautious when integrating innovations to ensure its original promise The book is based on empirical analysis by utilising the latest and global microfinance market data rather than focusing on a specific region Thus the book bridges a gap in knowledge by unravelling detail of the social purpose commercialization and innovations within the field of microfinance and will be a valuable resource for those exploring the dynamics of innovations in microfinance
