Atkinson,2025-06-24 The final book from a towering pioneer in the study of poverty and inequality a critically important examination of poverty around the world In this his final book economist Anthony Atkinson one of the world s great social scientists and a pioneer in the study of poverty and inequality offers an inspiring analysis of a central question What is poverty and how much of it is there around the globe The persistence of poverty in rich and poor countries alike is one of the most serious problems facing humanity Better measurement of poverty is essential for raising awareness motivating action designing good policy gauging progress and holding political leaders accountable for meeting targets To help make this possible Atkinson provides a critically important examination of how poverty is and should be measured Bringing together evidence about the nature and extent of poverty across the world and including case studies of sixty countries Atkinson addresses both financial poverty and other indicators of deprivation He starts from first principles about the meaning of poverty translates these into concrete measures and analyzes the data to which the measures can be applied Crucially he integrates international organizations measurements of poverty with countries own national analyses Atkinson died before he was able to complete the book but at his request it was edited for publication by two of his colleagues John Micklewright and Andrea Brandolini In addition Fran ois Bourguignon and Nicholas Stern provide afterwords that address key issues from the unfinished chapters how poverty relates to growth inequality and climate change The result is an essential contribution to efforts to alleviate poverty around the world Handbook of Economic Evaluation of HIV Prevention Programs David R. Holtgrave,2013-06-29 If resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to

expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations Cost Estimation Mr. Rohit Manglik, 2024-01-13
