Schools Debra A. Dace, 2010 The purpose of this study was to examine the predictive strength and decision making utility of oral reading fluency as it relates to reading comprehension The relationship of DIBELS ORF scores and the Language Arts LA Mississippi Curriculum Test 2 MCT2 scores was explored Specifically the research questions addressed were 1 Is there a significant relationship between third grade students Oral Reading Fluency score on DIBELS and Reading Achievement level on the third grade Mississippi Curriculum Test second edition MCT2 for language arts 2 Is there a significant relationship between third grade students obtained MCT2 proficiency levels of minimal basic proficient and advanced and DIBELS Oral Reading Fluency performance levels and 3 Is there a significant relationship between third grade students obtained MCT2 language arts scale score student achievement and other factors gender lunch status and attendance When DIBELS ORF scores and MCT2 Language Arts scores were compared using the Pearson Product Moment Correlation a positive correlation existed for the data collected from 261 third grade students in the Mississippi delta region 2007 2008 and 2008 2009 cohorts A Two Way Chi Square revealed that students who performed at the low risk benchmark for DIBELS ORF also performed in the proficient and above ranges on the MCT2 LA Finally an Independent Samples T Test demonstrated that other factors such as gender and attendance were not significant in predicting MCT2 LA performance However lunch status showed some significance with one cohort of third grade students Nevertheless the findings from this study are in alignment with other states such that a high correlation between the state assessment MCT2 and DIBELS ORF exists The researcher found evidence that the use of DIBELS ORF as a formative assessment tool along with other variables may provide useful data to educators to identify students at risk of reading failure on the third grade end of year MCT2 LA The information provided from this research supports the contention that DIBELS ORF data may be used to inform intervention decisions in order to prevent future reading failure
