

Semantics and Pragmatics-4

On the other hand the range of uses a sentence can be put to, depending on context, would be the object of study for pragmatics.

Semantics is concerned with sentence meaning and pragmatics with speaker meaning. Knowing the first is part of semantic knowledge and working out the second is a task for one's pragmatic competence.

A semantics/pragmatics division enables semanticists to concentrate on just the linguistic element in utterance comprehension. Pragmatics would then be the field which studies how hearers fill out the semantic structure with contextual information.

Aspect and Aktionsart Francis G. H. Pang, 2016-02-02 In *Revisiting Aspect and Aktionsart* Francis G H Pang employs a corpus approach to analyze the relationship between Greek aspect and Aktionsart Recent works have tried to predict the meanings that emerge when a certain set of clausal factors and lexical features combine with one of the grammatical aspects Most of these works rely heavily on Zeno Vendler's telicity distinction Based on empirical evidence Pang argues that telicity and perfectivity are not related in a systematic manner in Koine Greek As a corollary Aktionsart should be considered an interpretive category meaning that its different values emerge not from the interaction of only one or two linguistic parameters but from the process of interpreting language in context
