discussed on the UNESCO grounds during the three development decades Starting in the early 1960s Czechoslovakia sent
abroad hundreds of experts hoping to stimulate the development of local educational and scientific institutions However over
the years the development aid to African countries transformed into a special form of foreign trade and distribution of
experts turned into a profitable business Yet the tendencies towards sustainability and higher return on investment in the
field of development aid were not limited just to the socialist bloc but emerged globally This book therefore not only revisits
the roles of Czechoslovakia and Africa in the Cold War history but also reflects on the function of aid in international politics
