

## Controls

Before proceeding with Operation and Adjustment at your unit, refer to page 34 for Connection Instructions.

### LEVEL ADJUST

This rotary control (located on the back of the unit) sets the overall output level, or volume, of the unit. Greater changes in volume may be made with the VOLUME control on the Side Control Panel.

### TUNE

This rotary control (located on the back of the unit) provides a range of tuning, which extends more than one-half octave. This flexibility can be used to tune your MOOG SATURNE to other instruments, transposers or different keys, or even provide a glissando effect.

### POWER AND INDICATOR LIGHT

An ON-OFF power switch is conveniently located on the front panel, with a red light shown indicated when the power is ON.

### OCTAVES

With neither tab depressed, your MOOG SATURNE will play in its highest pitch level. Depress tab "1", and whatever you play on the keyboard will be one octave lower. Depress tab "2" and the keyboard pitch level is lowered another octave. Depress both tabs and the pitch level is lowered with a third octave. Because of the electronic filtering of the sounds to the characteristics of each pitch level, you will find that the effectiveness of every sound seems to change markedly as you change from octave to octave. Try all sound effects in all four pitch levels.

### SUSTAIN

This "Quick-Son" tab allows the sound of a note to "linger" after the key is released. It provides sustaining variations in the special voice settings described in this Manual.
