

Fig. 5

**IMPORTANT:** In the following operations the needle must always be **ABOVE** the surface of the machine. Raise the needle by turning balance wheel **TOWARD YOU** by hand.

### REMOVING THE BOBBIN CASE

Open the slide plate (Fig. 7) by sliding it out. With left thumb and forefinger, open the hinged latch (A) (Fig. 5) at the front of the bobbin case and hold securely as you withdraw bobbin case from around the holder post (D). When held in the above manner the bobbin will not fall out of the bobbin case.

### INSERTING THE BOBBIN CASE

After winding a fresh bobbin and threading the bobbin case (see Pages 9 and 10), hold the bobbin case latch with left thumb and forefinger, (as explained above) to prevent the bobbin from falling out. Keeping the protruding finger (B) topside toward the delivery eye (C), press the bobbin case around the holder post until the finger enters the delivery eye. When in correct position a stud on the holder post will catch the latch mechanism holding the bobbin case firmly in place. This operation is easy — **NEVER FORCE IT**. The three or four inches of thread hanging free from the bobbin case will be brought up through the needle plate hole as shown on Page 12.
