

Pre-Lab Information

Purpose	Explore the relationship between temperature and solubility using a laboratory procedure.
Time	Approximately 45 minutes
Question	What is the effect of temperature on the solubility of a solid in a liquid?
Hypothesis	If the temperature of the liquid is increased, then more sugar will dissolve because warm solutions hold more solute than cold solutions.
Variables	<i>Independent Variable:</i> temperature of water <i>Dependent Variable:</i> amount of sugar that can be dissolved
Summary	You will measure the amount of sugar you can dissolve at four (or more) different temperatures of water and analyze the resulting data.

Safety

- Always wear a lab gown and safety goggles while performing an experiment.
- Behavior in the lab needs to be purposeful. Use caution while working around the hot plate.
- Check glassware, such as your beaker, for cracks and chips prior to use.
- Remember to always use the tongs while handling the hot beaker.
- Report all accidents—no matter how big or small—to your teacher.

Procedure

Step 1: Gather Materials

- 100 mL beaker
- beaker tongs
- spoon
- stirring rod
- thermometer
- hot plate
- hot pad
- balance
- 300 g sugar
- ice
- water

Step 2: Measure the Mass of One Spoonful of Sugar

Use a weighing paper to measure the number of grams of sugar that are in one spoonful of sugar. Be sure to use a level spoonful, not a heaping spoonful, to help ensure that each time you add sugar, it is approximately the same amount. Record that value above the data table.

Step 3: Measure Solubility in Cold Water

- Place ice in a 100 mL beaker. Fill the beaker with water until the ice and water total 50 mL. Stir until just a small amount of ice remains. Let the temperature of the chilled water stabilize to obtain a temperature $\approx 5^{\circ}\text{C}$ (between 0°C and 10°C).
- Record the temperature in $^{\circ}\text{C}$.
- Add a spoonful of sugar (again, a level spoonful, not a heaping spoonful). Stir using the stirring rod. Continue adding spoonfuls of sugar until the solution becomes saturated, stirring after each spoonful is added.
- After the solution reaches saturation, record the amount of sugar (in spoonfuls) dissolved before the saturation point. **Do not discard the solution; continue to use it throughout the rest of the procedure.**
