Powerless Diana Hernández, Jennifer Laird, 2025-04-08 Energy serves as the lifeblood of our daily experiences It permeates virtually every aspect of our existence facilitating nourishment safety and productivity When affordability threatens energy s availability a family s living situation can become untenable too cold too hot too dark and too often unhealthy and unsafe In Powerless sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity the inability to adequately meet household energy needs Approximately one in ten households in the U S are energy insecure and four in ten are at risk for energy insecurity These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions Drawing on survey data and interviews with one hundred energy insecure individuals and families Hernández and Laird detail the experience of energy insecurity Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills utility debt and disconnection from utility services They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems They are often forced to make difficult choices about what bills to pay These decisions are sometimes referred to as heat or eat choices as families cannot afford to pay for heating and food at the same time Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices This includes deliberate underconsumption of energy

enduring physical discomfort and using dangerous alternatives such as open flames ovens or space heaters to try to maintain a comfortable temperature in their home To be energy insecure is to suffer Despite the heavy toll of energy insecurity most people confront these difficulties behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hern ndez and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable energy resources Powerless creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality

The Works of Lord Byron George Gordon Byron Baron Byron,1852 **Hurricanes** Brienna Rossiter,2022-08-01 This gripping book provides an overview of hurricanes including how they form the most extreme events in history and how science and technology help keep people safe Short paragraphs of easy to read text are paired with plenty of colorful photos to make reading engaging and accessible *Educational Life-Forms* David R. Cole,2012-01-01 This book takes the philosophy of Gilles Deleuze and applies it to educational practice To understand how and why to do this David R Cole puts forward the notion of educational life forms in this writing which are moving concepts based on Deleuzian principles This book turns on and through the construction of the philosophy of life in education The life forms that will come about due to the philosophy of life in education rest on epiphanies the virtual and affect The author looks to infuse educational practice with the philosophy of life though not through simple affirmation or a construction of counter metaphysics to representation in education This book uses Deleuze for practical purposes and sets out to help teachers and students to think otherwise about the current praxis of education With this book *Educational Life Forms* which is an examination of the significance of the philosophy of Gilles Deleuze for education David R Cole proves himself to be one of the very small number of philosophers of education who has provided intelligent commentary of Deleuze s difficult corpus Cole keenly appreciates the conceptual creativity of Deleuze especially in relation to the concepts of life forms and body without organs and effectively demonstrates its practical implications for education Michael A Peters Professor Educational Policy Studies University of Illinois at Urbana Champaign David R Cole s *Educational Life Forms* Deleuzian Teaching and Learning Practice is a profound speculative work that offers both new ways of thinking about the philosophy of Gilles Deleuze as a practical thinker with ideas that can be applied at the coal face as it were and new ways of thinking about teaching and learning It engages with actual policy debates as they are played out in the complex reality of the classroom situation and brings to them a fresh perspective developed through a close reading of Deleuze This is an exciting new work which will berewarding reading for

both Deleuzians and non Deleuzians and is sure to win converts amongst the latter Ian Buchanan Editor Deleuze Studies Professor of Critical Studies Dean of research in the Arts and Social Sciences University of Wollongong In this thoughtful and engaging book David R Cole has given us an answer to the important question of how Deleuze's philosophy enters into the practice of education Cole situates this philosophy within existing debates around teaching and learning not only through a very lucid account of Deleuze's work and current theory but also through highly effective and often moving examples of practice This book is essential reading for anyone interested in Deleuze and education James Williams Professor of European Philosophy University of Dundee

Disaster Upon Disaster Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03 A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern Although a great deal of knowledge has been acquired regarding many aspects of disasters such as driving factors risk construction complexity of resettlement and importance of peoples culture very little has become protocol and procedure Disaster Upon Disaster illuminates the numerous disjunctions between the suppositions realities agendas and executions in the field goes on to detail contingencies predicaments old and new plights and finally advances solutions toward greatly improved outcomes
