

Pitfalls:

- After consolidating Quality Center into a single environment, we had over 250 projects, several housing 10 defects or less. ???
- Each Quality Center project was unique, and highly customized
- Testing groups were very isolated and had very little interaction with peers or staff
- High use of Excel upload processes
- A lot of manual rework causing user frustration with the tools
- No training around the tools
- Contractor-driven testing

Hurdles:

- Most of the QC projects were still active
- Admin permissions were very loose
- Most Admin personnel had no formal training
- The level of understanding of the tool was limited
- No environment management
- An understanding of the tools
 - Defect vs. Test Management
