

JOURNAL ENTRIES CHEAT SHEET

GUIDE TO JOURNAL ENTRIES

DOUBLE-ENTRY BOOKKEEPING

Double-entry bookkeeping is a system of accounting that requires every transaction to be recorded in at least two accounts. This system ensures that the accounting equation (Assets = Liabilities + Equity) remains balanced.

JOURNAL ENTRY

A journal entry is a record of a business transaction. It is the first step in the accounting cycle and is used to update the general ledger.

DEBITS & CREDITS

Debits and credits are the two sides of a journal entry. Debits are recorded on the left side of the entry, and credits are recorded on the right side. The accounting equation is: $Assets = Liabilities + Equity$.

ADJUSTING ENTRIES

Adjusting entries are journal entries that are used to update the accounts at the end of an accounting period. They are used to record accruals, deferrals, and depreciation.

REVERSING ENTRIES

Reversing entries are journal entries that are used to reverse the effect of an adjusting entry. They are used to correct errors and to ensure that the accounts are accurate at the end of the accounting period.

CLOSING ENTRIES

Closing entries are journal entries that are used to close the accounts at the end of an accounting period. They are used to transfer the balances of the temporary accounts (revenues, expenses, and dividends) to the permanent accounts (assets, liabilities, and equity).
