**of Automated Container Storage Systems** Nils Kemme,2012-11-07 The storage yard is the operational and geographical  
centre of most seaport container terminals Therefore it is of particular importance for the whole terminal system and plays a  
major role for trade and transport flows One of the latest trends in container storage operations is the automated Rail  
Mounted Gantry Crane system which offers dense stacking and offers low labour costs This book investigates whether the  
operational performance of container terminals is influenced by the design of these storage systems and to what extent the  
performance is affected by the terminal s framework conditions and discusses the strategies applied for container stacking  
and crane scheduling A detailed simulation model is presented to compare the performance effects of alternative storage  
designs innovative planning strategies and other influencing factors The results have useful implications future research
