

Kaplan NCLEX Sample Test 2 Exam Questions With Correct answers

The nurse in the pediatric clinic performs a well-child assessment on a 15-month-old. The child's mother tells the nurse that she is very excited because her mother is visiting. The grandmother rarely visits, and the child's mother is pleased that grandmother and grandchild will spend time together. Which of the following responses by the nurse is MOST important?

1. "Your toddler may be fearful when left alone with her grandmother."
2. "How long is your mother staying?"
3. "Does your mother take any medication?"
4. "I'm sure your mother will enjoy her grandchild."

Strategy: "MOST important" indicates priority.

1) toddlers display less fear of strangers as long as parents are present; when left alone, the toddler may be fearful or anxious; appropriate information for the nurse to relate to the mother; psychosocial need

2) not the most important question

3) CORRECT— because toddlers explore by putting things in their mouths, parents should be aware of all potentially toxic substances in the home; parents should be aware if visitors in the home are taking medication, which should not be left in purses or suitcases lying around

4) safety takes priority

The nurse cares for client diagnosed in stage I chronic renal failure. During the nursing assessment, the nurse expects the client to state which of the following?

1. "I don't seem to urinate as much as I used to."
2. "I seem to have more swelling in my feet and ankles."
3. "I urinate more at night."
4. "The doctor told me I need dialysis."

Strategy: Think about what the client's words mean.

1) oliguria occurs during stage II (renal insufficiency)
