McDonald,2016-11-01 There is a widespread assumption that the American food system after World War II was transformed toward an increasingly industrialized production of crops more processed foods and diets higher in fat sugar and calories as part of a unified system In this book Bryan McDonald brings together the history of food agriculture and foreign policy to explore how food was deployed in the first decades of the Cold War to promote American national security and national interests a concept referred to as food power In the postwar years Americans struggled to understand how an unprecedented abundance of food could be used to best advance U S goals and values Was food a weapon a commodity to be valued and exchanged through markets or a substance to be provided to those in need McDonald traces different visions of food power and shows how food formed an essential part of America s postwar modernization strategy and its vision of what it meant to be a stable secure and technologically advanced nation Policymakers and experts helped build a new food system based around American agricultural surpluses that stabilized prices and food availability This system averted a global scale food crisis for almost three decades The end of this food system in the early 1970s ushered in a much more precarious period in global food relations By the late twentieth century food politics had become a battleground in which the interests of security and foreign policy experts farmers businesses and politicians contended with a growing social movement whose adherents worried about the role of food in contributing to conflict and inequality Food Power argues that the ways postwar American policymakers and experts politically linked people and places around the world through food illuminates both America s role in the world during the mid twentieth century and sheds light on contemporary food problems      Rifle Platoon and Squads United States. Software and CD-ROM Reviews on File, 2001 *FMFM.*, **The Evolution Of U.s. Army Nuclear Doctrine, 1945-1980** John P Rose, 2019-07-09 The development of U S Army nuclear doctrine policies plans procedures tactics and techniques since World War II its impact on Army forces and its role in future wars is the subject of this policy oriented analysis The definition of Army nuclear doctrine advanced by the author clearly implies a distinction between policy for the employment of nuclear weapons as determined by the president and the role adduced by the Army Dr Rose suggests that developments both nuclear and conventional in U S Army tactical doctrine have been more responsive to political preferences held by national authorities than to the real nature of the potential threat and rigors of the nuclear battlefield Further he argues that the type of war preparations favored by U S political authorities over the last fifteen years and the type of war for which the Soviet Union is preparing differ markedly making the U S Army poorly prepared for a major war

Destruction Rites Mona Hadler, 2017-01-30 In the early sixties crowds gathered to watch rites of destruction from the demolition derby where makeshift cars crashed into each other for sport to concerts where musicians destroyed their instruments to performances of self destructing machines staged by contemporary artists Destruction in both its playful and

fearsome aspects was ubiquitous in the new Atomic Age This complicated subjectivity was not just a way for people to find catharsis amid the fears of annihilation and postwar trauma but also a complex instantiation of ideological crisis in a time with some seriously conflicted political myths Destruction Rites explores the ephemeral visual culture of destruction in the postwar era and its links to contemporary art It examines the demolition derby games and toys based on warfare playgrounds situated in bomb sites and the rise of garage sales where goods designed for obsolescence and destined for the garbage heap are reclaimed and repurposed by local communities Mona Hadler looks at artists such as Jean Tinguely Niki de Saint Phalle Martha Rosler and Vito Acconci to expose how the 1960s saw destruction construction and the everyday collide as never before During the Atomic age whether in the public sphere or art museums destruction could be transformed into a constructive force and art objects and performances often oscillated between the two
