So far you have designed H_{∞} controllers that meet the performance objectives for the nominal value discussed earlier. This model is only an approximation of the true structure and you need to make sure performance is maintained in the face of model errors and uncertainties. This is called robust performance. Next you will synthesize design μ controllers that achieve robust performance for the entire family of uncertain structures by synthesizing with the design function using the structured singular value μ , i.e., μ or “structured” performance (μ vs H_{∞}).
