MaxoForce® 11 and 13 engines are equipped with a high pressure common rail injection system. The common rail fuel injection system provides pressurized fuel to the fuel injectors for optimal fuel atomization in the combustion chamber.

All excess fuel is returned to the chassis mounted filter separator, before returning to the fuel tank.

The fuel system is controlled by the ECM, various sensors, and the Fuel Pressure Metering Unit (FPMU) located in the HP pump. For additional information, refer to LP Fuel System and HP Fuel System in this section.
