

The results of the study show that the 1997-1998 El Niño event had a significant impact on the biodiversity of the mountain peaks of the Andes. The study was conducted in the Cordillera Occidental of the Andes, where the effects of the El Niño event were particularly pronounced. The study found that the number of species of plants and animals that survived the El Niño event was significantly lower than the number of species that died. This was due to the fact that the El Niño event caused a significant increase in the temperature and precipitation of the region, which led to the death of many species. The study also found that the El Niño event had a significant impact on the distribution of species, with many species moving to higher altitudes in search of cooler temperatures and lower precipitation.

*Ford Bronco* Todd Zuercher, 2019-04-15 GIs returning after World War II created an entirely new automotive market niche when they bought surplus Jeeps and began exploring the rugged backcountry of the American West. This burgeoning market segment which eventually became known as sport utility vehicles (SUVs) numbered about 40 000 units per year with offerings from Jeep Scout Toyota and Land Rover. In 1966 Ford entered the fray with its Bronco offering increased refinement more power and an innovative coil spring front suspension. The Bronco caught on quickly and soon established a reputation as a solid backcountry performer. In Baja the legendary accomplishments of racers such as Parnelli Jones Rod Hall and Bill Stroppe further cemented the bobtail's reputation for toughness. Ford moved upstream with the introduction of the larger Bronco for 1978 witnessing a huge increase in sales for the second generation trucks. The Twin Traction Beam front end was introduced in the third generation and further refinements including more aerodynamic styling greater luxury and more powerful fuel injected engines came on board in the generations that followed. Through it all the Bronco retained its reputation as a tough versatile and comfortable rig both on and off the paved road. With the reintroduction of the Bronco for 2020 Ford is producing a vehicle for a whole new generation of enthusiasts that looks to bring modern styling and performance to the market while building on the 30 year heritage of the first five generations of the Bronco so dearly loved by their owners. From the development process and details of the first trucks through the 1996 models author Todd Zuercher shares technical details rarely seen photos and highlights of significant models along with the stories of those people whose lives have been intertwined with the Bronco for many years. This book will have new information for everyone and will be a must have for longtime enthusiasts and new owners alike. p 1 margin 0 0px 0 0px 0 0px font 12 0px Arial color 000000
