

Physiology of the Normal ECG Waveform (Lead II)

Start of ECG waveform

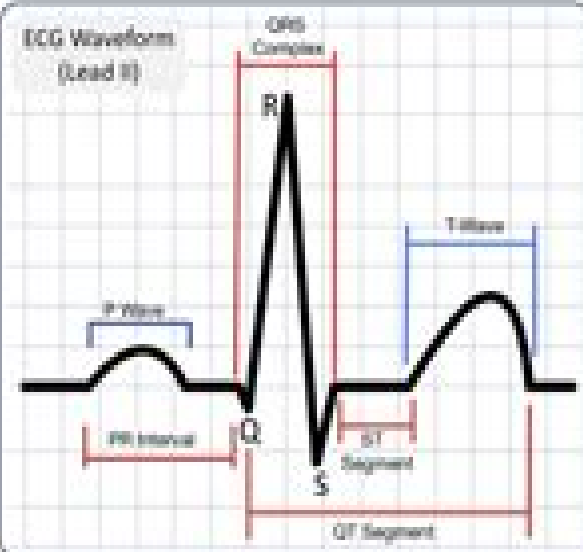

Authors:
Davis MacLaren, Mahul Gupta, Amanda Nguyen, Ran Yu*

Reviewers:
Luke Gagnon, Paige Shelaney, Katie Lin*

* MD at time of publication

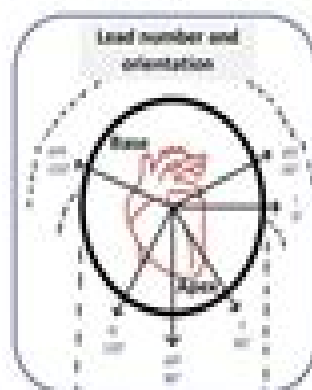

Regular intervals of P-waves followed by QRS complexes (60-100 P-waves/min, 60-100 QRS/min) = "normal sinus rhythm"

Note: for simplicity, we will only use Lead II to explain the direction of ECG deflections. However, the same principle applies to all leads:

- Depolarization moving towards the lead $\rightarrow$ upward deflection on ECG
- Depolarization moving away from the lead $\rightarrow$ downward deflection on ECG

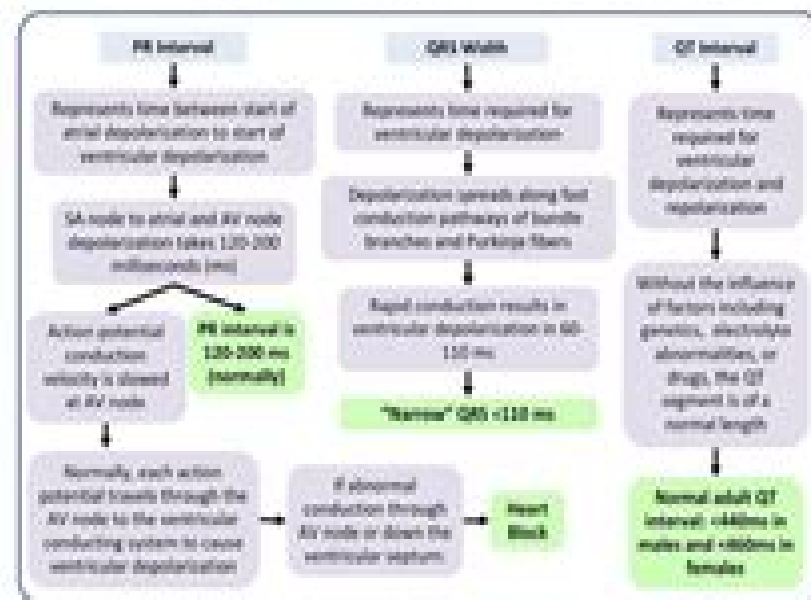

End of waveform

Note:

- Q Waves: "small Q-waves can be seen in lead II and are non-pathologic as they represent the left to right depolarization of the ventricular septum. Larger Q waves are pathologic and are usually indicative of previous infarct/ischemia.
- Also: For an explanation of how to tell the Axis from an ECG, please consult the relevant Calgary Guide slide on the subject.

Note: Normally, the apex of the heart points down and to the left of the body, in the direction of leads I, II, and aVF. Since QRS deflections on ECG reflect the direction of ventricular depolarization, an upward QRS deflection in these leads means the heart's apex is pointed in a normal direction (normal "axis").

Electronic Components Guide Ecg

Marco Cascella

Electronic Components Guide Ecg:

Embark on a breathtaking journey through nature and adventure with Crafted by is mesmerizing ebook, Natureis Adventure: **Electronic Components Guide Ecg** . This immersive experience, available for download in a PDF format (Download in PDF: *), transports you to the heart of natural marvels and thrilling escapades. Download now and let the adventure begin!
