**Measuring Oral Proficiency Through Paired-task Performance** Ildikó Csépes, 2009 This book intends to provide a theoretical overview of examining candidates oral abilities in different examination formats In particular it explores specific partner effects on discourse outcomes and proficiency ratings in the framework of paired task performance Two investigations both set in the context of a proposed Hungarian school leaving examination in English were carried out in order to contribute to a better understanding of the assumed impact of the chosen variables Study One investigates discourse differences between examiner to examinee interaction and peer to peer interaction Study Two explores the impact of the peer partner s proficiency The results show that partner effects related to this variable cannot be predicted as either harmful or beneficial since no statistically significant difference was found between 30 candidates scores in different examination conditions *European Language Testing in a Global Context* Michael Milanovic, Cyril J.
