Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research Johannesburg ,2000 *The Publishers' Circular and Booksellers' Record* ,1913 *The Art of Environmental Law* Benjamin J Richardson, 2019-12-12 Environmental law has aesthetic dimensions Aesthetic values have shaped the making of environmental law and in turn such law governs many of our nature based sensory experiences Aesthetics is also integral to understanding the very fabric of environmental law in its institutions procedures and discourses The Art of Environmental Law the first book of its kind brings new insights into the importance of aesthetic issues in a variety of domains of environmental governance around the world from climate change to biodiversity conservation It also argues for aesthetics and relatedly the arts to be taken more seriously in the practice of environmental law so as to improve our emotional and ethical capacities to address the upheavals of the Anthropocene *The Publisher* ,1913 **Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1913 **National Geographic Road Atlas** National Geographic Society, MapQuest.com, Inc, Melcher Media, 2001 *Managing People in Sport Organizations* Tracy Taylor, Alison Doherty, Shannon Kerwin, 2024-12-11 Now in a fully revised and updated third edition Managing People in Sport Organizations outlines the theory and practice of managing people within a strategic framework A complete textbook for any human resource management HRM in sport course it explains how sport managers can get the best out of their teams and organizations develop their professional skills and create a sustainable performance culture Structured around the functional flow of HRM practice from recruitment to rewards the book introduces every key area of people management
